Introduction

The *Consult/Request Tracking User Manual* provides descriptions of Consults' options and other information required to effectively use the Consult/Request Tracking package (or Consults).

This manual is for people who use the Consults package in the course of their hospital duties, including:

- Care providers: doctors, nurses, pharmacists, and therapists who make or service requests for consultations on patients.
- Clerical staff, who assist the above-mentioned people.
- Quality Assurance and management, who have an interest in seeing that VA patients receive the best possible care.
- Consults functionality is available from a Windows interface (GUI—Graphical User Interface) on a PC workstation or from a roll-and-scroll List Manager (LM) interface on a traditional CRT (Cathode Ray Tube) terminal or terminal emulation software on a PC workstation.

You can pull out parts of this manual, such as the **User Introduction to GUI** section or the **Package Operation** section, to use for unit training or reference. General parts of this manual, such as the **Package Orientation** section, have been written with examples from Consults to make the general information more meaningful to this application.

Overview

Purpose

Consult/Request Tracking package V. 3.0 improves the quality of patient care by:

- Interfacing with CPRS to provide an efficient mechanism for clinicians to order consults and procedure requests.
- Providing consulting services with the ability to update and track the progress of a consult/procedure request from the point of receipt through its final resolution.
- Providing results reporting that includes doctor's notes and comments entered during the tracking process.

Relationship to Other Packages

The Consults package works with the following packages:

- Computerized Patient Record System (CPRS)
- Text Integration Utilities (TIU)

Relationship of Consults to CPRS

From CPRS Actions to Consults:

- Ordering
- Order checking
- Order updates via HL7 messages
- Inter-Facility Consults via HL7 messages
- Tracking Consults activity
- Resulting TIU and Consults
- Notifications

From Consults actions to CPRS:

- Consult status changes update the CPRS order
- Forwarded and edit/resubmitted consults get a new service/correction order from CPRS
- Sends alerts based on consult activity

Relationship of Consults to TIU

From TIU Actions to Consults:

- Select a consult to associate with a note
- One consult link per consult note
- Sends TIU updates to consult package for:
- New consult note entered

- Consult note completed
- New addendum completed
- Disassociate a note
- Extract notes for SF 513 and displays

From Consult Actions to TIU:

- A consult may have multiple notes associated with it.
- Lists the notes associated with a consult.
- Uses TIU to act on a note.
- Updates consult status and activity log from TIU updates.

Enhancements since Version 2.5

GMRC*3*73

This patch is part of the Computerized Patient Records System CPRSv30 project. This project will modify the Computerized Patient Record System, Text Integration Utilities, Consults, Health Summary, Problem List, Clinical Reminders, and Order Entry/Results Reporting to meet the requirements proposed by the Dept. of Health and Human Services to adopt ICD-10 code set standards Clinic Orders.

On January 16, 2009, the Centers for Medicare & Medicaid Services (CMS) released a final rule for replacing the 30-year-old ICD-9-CM code set with International Classification of Diseases, Tenth Revision, Clinical Modification (ICD-10-CM) and International Classification of Diseases, Tenth Revision, Procedure Coding System (ICD-10-PCS) with dates of service, or date of discharge for inpatients, that occur on or after October 1, 2015. The classification system consists of more than 68,000 codes, compared to approximately 13,000 ICD-9-CM codes. There are nearly 87,000 ICD-10-PCS codes, while ICD-9-CM has nearly 3,800 procedure codes. Both systems also expand the number of characters allotted from five and four respectively to seven alpha-numeric characters. This value does not include the decimal point, which follows the third character for the ICD-10-CM code set. There is no decimal point in the ICD-10-PCS code set. These code sets have the potential to reveal more about quality of care, so that data can be used in a more meaningful way to better understand complications, better design clinically robust algorithms, and better track the outcomes of care. ICD-10-CM also incorporates greater specificity and clinical detail to provide information for clinical decision-making and outcomes research.

This patch installs the necessary routine updates to make the GMRC package compliant with the mandate to use ICD-10 codes. The installation also contains one post-install routine that will populate the new PROVISIONAL DIAGNOSIS DATE (30.2) and PROVISIONAL DIAGNOSIS SYSTEM (30.3) fields for existing entries in the REQUEST/CONSULTATION (#123) file. The PROVISIONAL DIAGNOSIS DATE will be populated using the value pulled from FILE ENTRY DATE (.01) field. The PROVISIONAL DIAGNOSIS SYSTEM field will be populated with "ICD" to indicate these diagnoses are from the ICD-9-CM coding system. These fields are only populated for existing entries where the provisional diagnosis contains an ICD code. Consult records with a free-text diagnosis will not have these fields populated.

See page 76 for examples of new displays as a result of GMPL*2*73.

General Overview of Consults/Request Tracking

- Consults can be accessed through Windows NT, Windows 95, or a later Microsoft Windows version with the CPRS GUI Interface or through the List Manager (LM) interface.
- Consult ordering is managed by CPRS Order Entry from within the CPRS Order tab. This includes Quick Orders.
- Consult resulting is based on TIU Consult Notes, Medicine package results, and provider comments.
- Services must be defined within the ALL SERVICES hierarchy in order to access their consults and requests.
- Tracking services are not orderable unless the user is an update user for the service or its parent service.
- The ordering provider may edit and resubmit a consult after it has been canceled.

Alert Actions

- Users can process consult service update actions from the alert.
- The recipient of an alert for a cancelled request can edit and resubmit the request from the alert .

Reporting

- The Standard Form 513 is based on a hard-coded consults routine instead of the OE/RR Print Formats. This facilitates results printing when the consult reaches final resolution.
- A report with completion time statistics has been added.
- A report with pending consults has been added.
- Lists of consults can be viewed by order status, service, and/or date range.

Communications

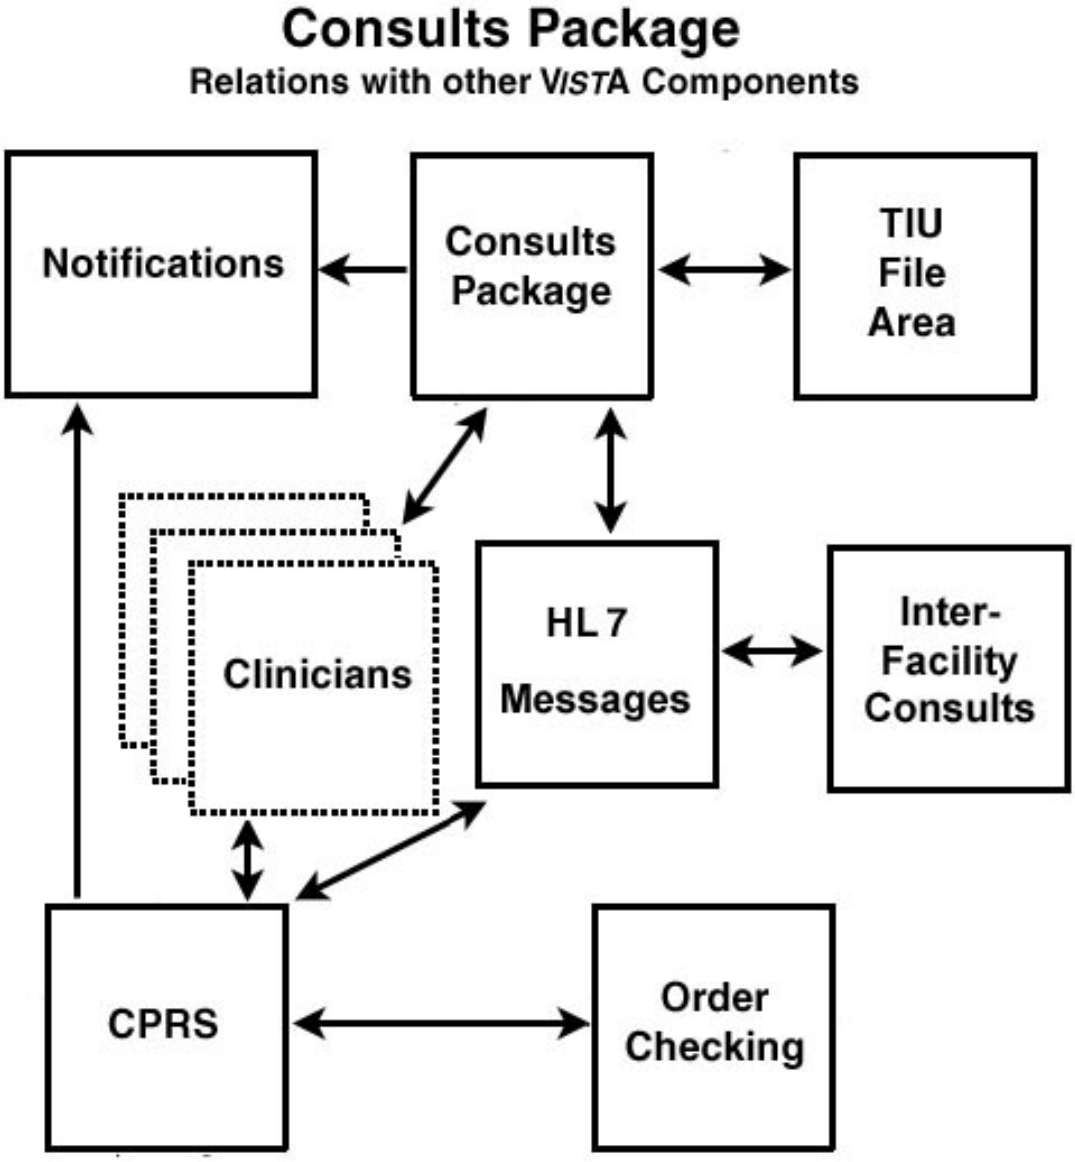
- HL7 messages and protocols are the communications medium between CPRS and Consults.

Setup

Consult services have a related entry in the CPRS Orderable Items file (#101.43). Management of procedures and services must be done through Consult options.

Relations with other VistA Components

The Consults package communicates with CPRS through HL7 messages. Order Checking receives information from the Consults package through CPRS. Notifications is the only major package that Consults communicates with directly. When the requesting clinician signs the order, Consults sends a notification to the consulting physician and when the consulting physician signs the final report, Consults sends a notification to the requesting physician.



Inter-Facility Consults (IFC) are requested, acted upon, and viewed the same way as regular Consults. Typically consults that are handled at a different facility have the remote facility indicated in their title, such as “Eye Exam—Salt Lake.” The software uses HL7 messaging in the background to communicate inter-facility consults and actions between

cooperating facilities. Results are filed at the resulting facility, but since CPRS uses Remote Data Views in the background to access the results, users do not need to treat Inter-Facility Consults any differently.

Related Manuals and Other References

If you are an ADPAC or IRM personnel, the *Consult/Request Tracking Technical Manual* would probably aid in your understanding of Consults setup and operation.

Consults is installed with CPRS, so the *CPRS Installation Guide* is the appropriate manual to refer to on installation issues that aren't covered in the *Consult/Request Tracking Technical Manual*.

TIU provides boilerplate text and other text-oriented services. The *TIU Clinical Coordinator & User Manual* would assist you in using these features.

Consults package is highly integrated with CPRS. As such, any Consults package user should be familiar with the *CPRS Clinician's Getting Started Guide* and the *CPRS Clinical Coordinator & User Manual.*
See our web pages at:

vista.med.va.gov/consults
and
vista.med.va.gov/cprs

Package Management

Service Update and Tracking Security

Your ADPAC can use the Consult Service User Management option, in conjunction with availability to various menus and options, to control access to Consults functionality. The menus that can be provided to you are:

Consult Service Tracking

The Consult Service Tracking menu provides access to basic consult tracking functions and reports, but can also provide complete update capabilities if you have been granted update privileges by your ADPAC.
Individual options in the Consults package that may be useful to you, and what access they provide, are detailed in the following table:

Option	Services
Consult Service Tracking	Tracking and/or update functionality depending upon your individual privileges.
Completion Time Statistics	Reporting.
Service Consults Pending Resolution	Reporting.

With the GMRC Service User Management option, your ADPAC can set you up to be an update user for one or more services at your hospital. In addition, the ADPAC can grant the ability to receive consult notifications according to criteria outlined in the following table:

Category	Notifications Received
UPDATE USERS W/O NOTIFICATIONS	Unless otherwise set up, will not receive notifications.
UPDATE TEAMS W/O NOTIFICATIONS	Unless otherwise set up, will not receive notifications.
UPDATE USER CLASS W/O NOTIFS	Unless otherwise set up, will not receive notifications.
SERVICE INDIVIDUAL TO NOTIFY	Receive consult notifications for your service.
SERVICE TEAM TO NOTIFY	Receive consult notifications for patients assigned to your team.*
NOTIFICATION BY PT LOCATION INDIVIDUAL TO NOTIFY	Receive all consult notifications for your service for patients in a specified ward.
NOTIFICATION BY PT LOCATION TEAM TO NOTIFY	Receive consult notifications for patients assigned to your team and in a specified ward
SPECIAL UPDATES INDIVIDUAL	An individual who has privileges to perform group status updates.

These categories are not mutually exclusive, meaning you may receive notifications based on being present on one or more of the lists detailed in the foregoing table.

* NOTE: The service team does not receive the CONSULT/REQUEST UPDATED notification if another member of that team or an update user is the user adding the comment

Privilege	Granted
Originate a consult	Anyone with access to CPRS
Sign a consult	Anyone who can sign an order
Change a consult status	Anyone with update privileges
View or print a consult	Anyone with access to CPRS

In summary, update user capabilities vary depending on

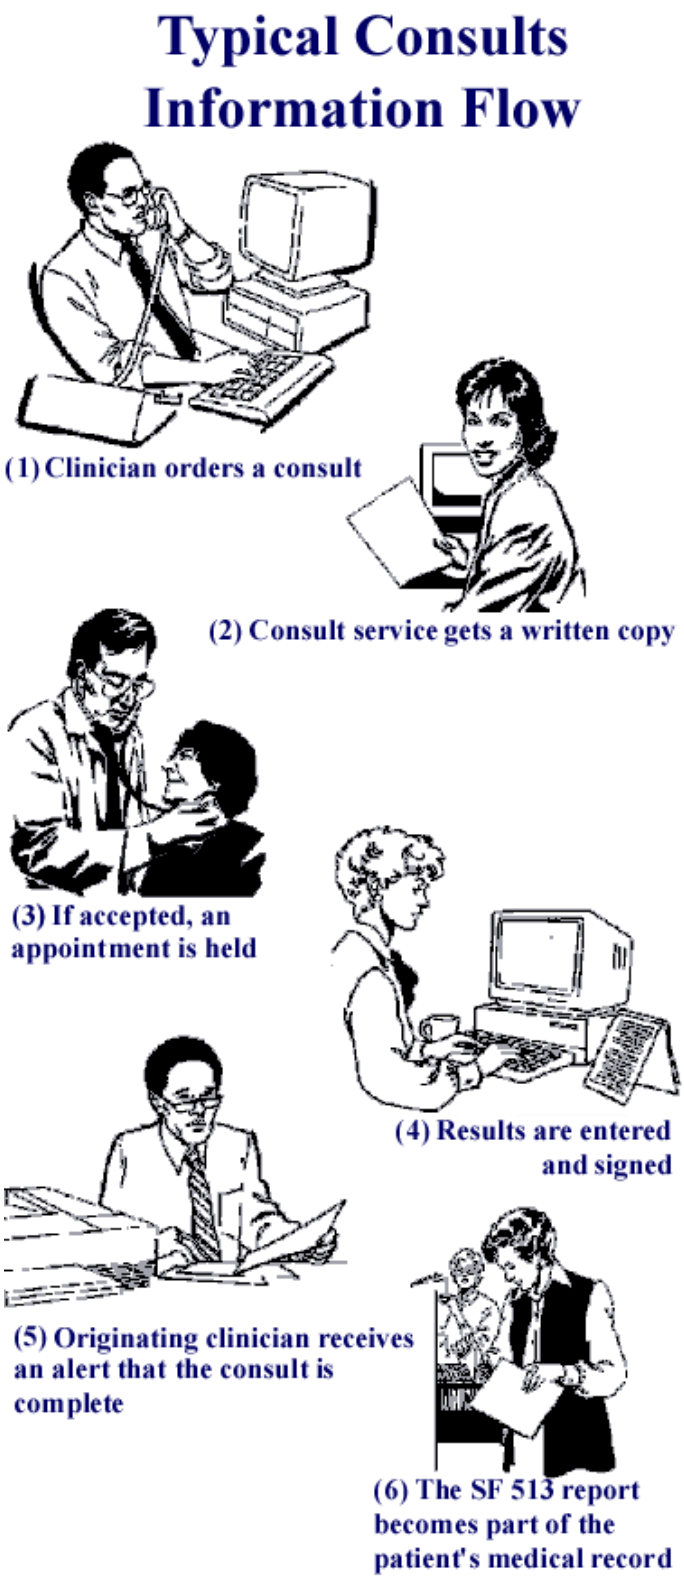
The option(s) that you are assigned.
Privileges granted in the Consults Service User Management option.

Package Operation

The operation of the Consults package involves multiple people, at various skill levels, in various parts of the hospital. A consult request may be entered by a clinician or a clerk under a clinician's direction. This request acts as a depository of information about itself. It collects notes and keeps records on everything that happens to it. When complete it becomes part of the patient's medical record.

In the pages that follow, we present this flow of information, and show the actions that must be taken at each step in the process. Many of these actions must be taken by persons other than those originating the consult.

Also, Consults uses CPRS during the initiation process and TIU during the completion process. In this section, we give some information about each of these packages that may help you in using Consults.



Workflow

1. The clinician orders a consult. While in a patient's CPRS medical record, a clinician enters an order for a consultation or procedure.

2. The consult service gets a written copy. An alert and a hard-copy of the SF 513 are sent to the consult service.

3. If accepted, an appointment is held. To accept the consult, the service uses the **receive** action. The service can also **discontinue** or **cancel** the consult. Cancelled consults can be edited and re-submitted by the ordering clinician.

4. Results are entered and signed. The consult service enters results and comments. Resulting is primarily done using TIU.

5. The originating clinician receives an alert that the consult is complete. The results can now be examined and further action taken on behalf of the patient.

6. The SF 513 report becomes part of the patient's medical record. A hard copy can be filed and the electronic copy is on line for paperless access.

1. The Clinician Orders a Consult

Consult orders can be entered:

From the CPRS medical record screen, Consults tab
CPRS GUI interface program, Consults tab

Ordering Within the CPRS Package

Primarily, Consult orders should be placed through the CPRS Add New Orders action. In this manual we provide a step-by-step display of the process for ordering consult or procedures requests through the CPRS package. We first go through a brief list of steps, then we discuss each step in detail.

To Order a Consult:

A. Select CPRS Clinician Menu (OE) from the Clinician Menu.
B. Select the patient.
C. Select Chart Contents then Consults.
D. Select Order New Consult.
E. Answer questions on the particulars of the request.

To go over in detail how to order a consult:

A. Select CPRS Clinician Menu (OE) from the Clinician Menu

Exactly how you do this option depends on how IRM or your ADPAC set up your menu. This example shows one way of performing step A.

```
Select Clinician Menu Option: ?

   OE     CPRS Clinician Menu
   RR     Results Reporting Menu
   AD     Add New Orders
   RO     Act On Existing Orders
   PP     Personal Preferences ...

Enter ?? for more options, ??? for brief descriptions, ?OPTION for help text.

Select Clinician Menu Option: OE
```

The screen now looks like this:

```
Patient Selection            Apr 07, 1999 14:51:30          Page:   1 of  1
Current patient: ** No patient selected **

     Patient Name                   ID        DOB            Room-Bed
     No patients found.

          Enter the number of the patient chart to be opened                >>>
+    Next Screen           CV  Change View ...       FD  Find Patient
-    Previous Screen       SV  (Save as Default List)Q   Close

Select Patient: Change View //
```

B. Select the Patient

Select the patient as you would in any other package. Type a patient ID such as the patient's name, social security number, or the patient's last initial followed by the last 4 digits of the social security number. If more than one patient matches the key you entered, select the patient from the list presented on the screen.

```
Select Patient: Change View // C2342
   1   C2342  CPRSPATIENT,TWO       03-04-32     666902342      MILITARY RETIREE

   2   C2342  CPRSPATIENT,TWELVE    02-03-23     666242342      MILITARY RETIREE
CHOOSE 1-2: 2  CPRSPATIENT,TWELVE        02-03-23   666242342     MILITARY RETIREE

```

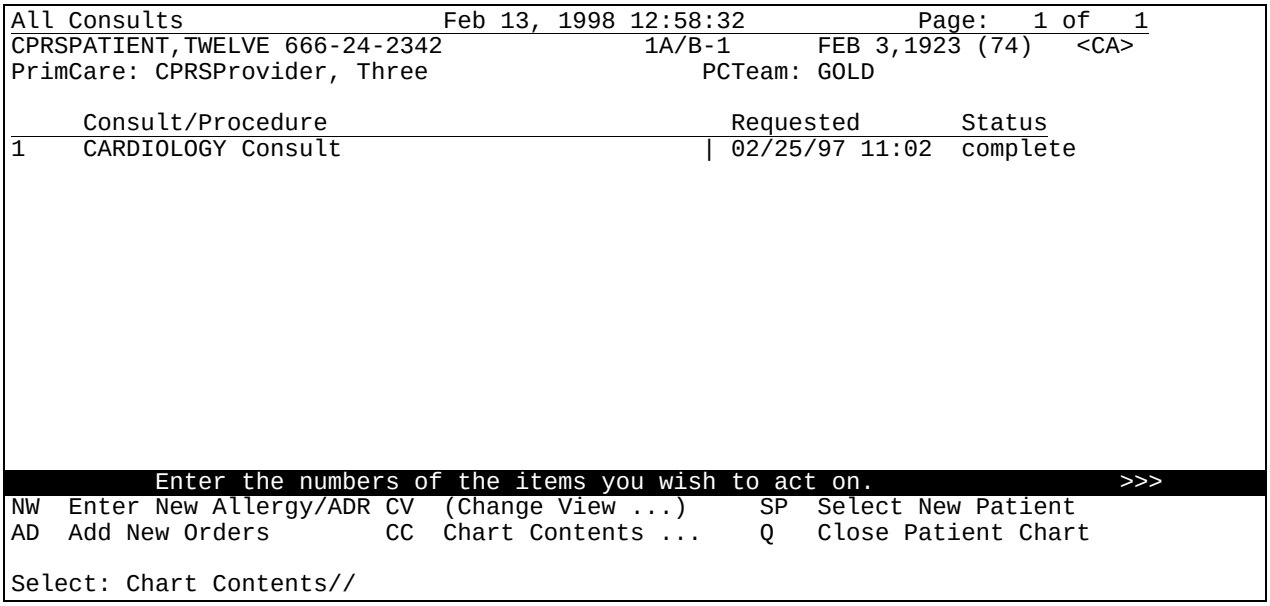
If the request is for a future service, such as an EKG in 6 months, then enter the future date here.

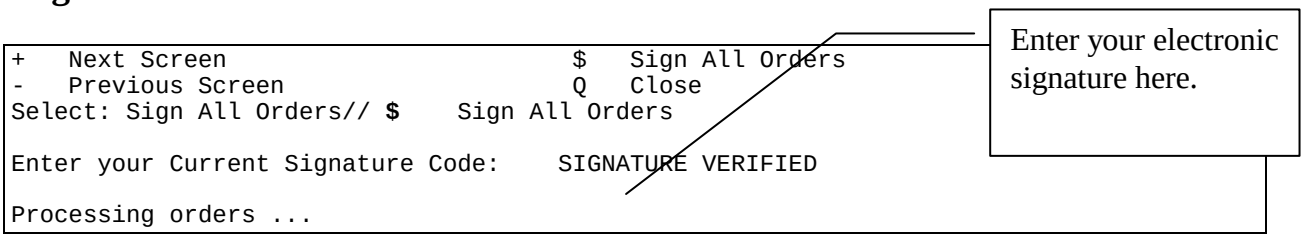
(Continued on the next page.)

The screen now looks something like this:



Notice that the consult just entered is not yet displayed. It is not displayed until after you have signed the order.

Sign the Consult



When applied to an approved medical record, an electronic signature has the same legal weight as a signature made with a pen on paper. For this reason electronic signatures are part of the overall security system maintained by IRMS.

When the computer prints a document that has been signed and/or cosigned, an electronic signature block is included. What appears in this block is user configurable through the User's Toolbox option.

In this example we change a title and electronic signature:

```
Select Consult Service Tracking Option: ??

   CS     Consult Service Tracking [GMRC SERVICE TRACKING]
   PC     Service Consults Pending Resolution [GMRC RPT PENDING CONSULTS]
   ST     Completion Time Statistics [GMRC COMPLETION STATISTICS]

Or a Common Option:

   CWA    Patient Warning (CWAD) Display [GMRPNCW]
   MA     MailMan Menu ... [XMUSER]
   TBOX   User's Toolbox ... [XUSERTOOLS]
   VA     View Alerts [XQALERT]
          Continue [XUCONTINUE]
             **> Reverse lock ZZLUKE
          Halt [XUHALT]
          Restart Session [XURELOG]
          Time [XUTIME]
          Where am I? [XUSERWHERE]

You have PENDING ALERTS
          Enter  "VA   VIEW ALERTS     to review alerts

Select Consult Service Tracking Option:  TBOX  User's Toolbox

Select User's Toolbox Option: ?

          Display User Characteristics
          Edit User Characteristics
          Electronic Signature code Edit
          Menu Templates ...
          Spooler Menu ...
          Switch UCI
          TaskMan User
          User Help

Enter ?? for more options, ??? for brief descriptions, ?OPTION for help text.

Select User's Toolbox Option: ELectronic Signature code Edit
```

```
This option is designed to permit you to enter or change your Initials,
Signature Block Information, Office Phone number, and Voice and
Digital Pagers numbers.
In addition, you are permitted to enter a new Electronic Signature Code
or to change an existing code.

INITIAL: CRS// <Enter>
SIGNATURE BLOCK PRINTED NAME: CPRSPROVIDER,SEVEN// <Enter>
SIGNATURE BLOCK TITLE: DOCTOR// MD
OFFICE PHONE: 588-5029
ANALOG PAGER: 4038
DIGITAL PAGER: <Enter>

Enter your Current Signature Code:    SIGNATURE VERIFIED

Your typing will not show.
ENTER NEW SIGNATURE CODE:
RE-ENTER SIGNATURE CODE FOR VERIFICATION:
DONE

Select User's Toolbox Option:
```

The electronic signature is typed here.

The new signature is typed here.

And here.

The signature block, as changed in the example above, looks like this:

```
                                                    /es/CPRSPROVIDER,SEVEN
                                                    MD
```

The /es/ annotation indicates that the medical document was electronically signed
If for some reason you do not sign an order at the time you write it, then the system enters the order into your list of alerts. Signing the order is then simply a matter of responding to the alert as in the following example:

```
You have PENDING ALERTS
          Enter  "VA   VIEW ALERTS     to review alerts

Select OE/RR Manager Menu Option: VA  View Alerts

 1.  CPRSPATIE (C0999): Order requires electronic signature.
 2.  TIUPATIEN (T3456): New  Consult/Request (Stat)

2. The Consult Service Gets a Written Copy

The consult service receives an alert and a printed SF 513. The Consultation Form is automatically generated in the receiving clinic when the requesting physician signs the order. (In the case of Inter-Facility Consults, the request in routed to the resulting facility and printed there.)

Caution: The Consultation Form (SF 513) generated by this package for use by the receiving services is highly confidential and should be treated with the same security precautions as other patient medical record documents.
The computerized consultation form created and printed by this package may only be placed in a patient's medical record, as a valid medical form, *if* it has been authorized for medical record use by the Medical Records Committee at your facility.

```

3. If Accepted, an Appointment is Held

It is fairly common for a consult to be sent to the wrong clinic. For this reason it is very easy to forward a consult to another clinic. Simply use the FR (Forward Request) action to specify the new receiving clinic.

In this example, a Neurology consult is forwarded to Psychiatry at the discretion of the consulting physician:

```
Select OPTION NAME: ORMGR          OE/RR Manager Menu      menu

You have PENDING ALERTS
          Enter  "VA   VIEW ALERTS     to review alerts

Receive the Consult

Performing the Receive action on a consult changes its status from Pending to Active. This puts your clinic on record as accepting responsibility for completing the consult. There are two ways to receive a consult:

From a consult tracking screen.
From a notification alert of a new consult. See page 129 for an example of this method.
In the following example, we receive a consult from a consult tracking screen:

```
CONSULT TRACKING              Oct 05, 2000 09:18:22          Page:    1 of    1

==[ WRAP ]==[ INSERT ]===< Patient: CPRSPATIENT,TWELVE >===[ <PF1>H=Help ]===
Mr. CPRSPatient's regimen is lacking in inhaled corticosteroids.  Recognizing
that asthma is an inflammatory process, inhaled steroids are important
in controlling the inflammatory response.  My practice for severely
out-of-control asthmatics is to use high-dose inhaled steroids,
typically vanceril, 16 puffs qid, with a spacing device such as the
Aerochamber. I would institute such a regimen while he is here.

Mr. CPRSPatient has an in-house pet dog and an outside pet cat.  I have
told him that the cat should go, even if it is outdoors.  Cat saliva
contains a glycoprotein that leaves residue on their coats and flakes
into the air; it is problematic for many asthmatics.

The purulent phlegm asthmatics have during exacerbations is usually
due to the eosinophils, not from infection.  Antibiotics are usually
not necessary.

If you like, you may refer Mr. CPRSPatient to my clinic after discharge.

5. The Originating Clinician Receives an Alert that the Consult is Complete

After the consult is complete, Notifications sends an alert (via FileMan Alerts) of the completion. This is done while you are in the menu terminal mode, as such:

```
CPRSPATIE (C8829): Completed Consult CAR
TIUPATIEN (T2342): Cancelled consult PLM
ARTPATIEN (A9898): Completed Consult GASTROENTEROLOGY
CPRSPATIE (C8831): Completed Consult PLM with Sig Findings
          Enter  "VA   VIEW ALERTS     to review alerts

Select Consult Service Tracking Option:
```

To receive an on-screen report of the results, respond as in the following example:

```
Select Consult Service Tracking Option: VA  View Alerts

 1.   CPRSPATIE (C8829): Completed Consult CAR
 2.   TIUPATIEN (T2342): Cancelled consult PLM

6. The SF 513 Report Becomes Part of the Patient's Medical Record

After the consult is complete, Consults sends an alert to the requesting physician. The requesting physician can use the Print Report action to obtain a copy of the final Consults report. In the following example, the consult we want to print has already been selected:

```

                      CONSULTATION NOTE #2330

       TITLE: PULMONARY CS CONSULT
DATE OF NOTE: NOV 01, 1997@10:15:35  ENTRY DATE: NOV 01, 1997@10:15:35
      AUTHOR: CPRSPROVIDER,SEVEN   EXP COSIGNER:
     URGENCY:                            STATUS: COMPLETED

At the time I went to examine the pt, he was acutely broncho-
spastic and in moderately severe respiratory distress.  I had him
deliver a puff of albuterol with an Aerochamber; his technique was
poor. I then instructed him and delivered an additional four puffs,
which he did with good technique.  He was improved and with a clear
lung exam within a few seconds (though wheezes were still present
on forced expiration).

The pt regimen is lacking in inhaled corticosteroids.  Recognizing
that asthma is an inflammatory process, inhaled steroids are important
in controlling the inflammtory response.  My practice for severely
out-of-control asthmatics is to use high-dose inhaled steroids,
typically vanceril, 16 puffs qid, with a spacing device such as the
Aerochamber. I would institute such a regimen while he is here.

/es/ CPRSPROVIDER,SEVEN

Quick Orders

Quick Orders are a feature of CPRS that allow certain prompts to be automatically filled in by the computer. Your ADPAC can set them up (a subject that is discussed in the *CPRS Setup Guide*.)

CPRS is shipped with a number of quick orders. Number 91, EKG, Portable on the screen pictured below is one of them. These quick orders do not have any of the fields filled in. They are only provided as place-holders and limited examples of what is possible.

```

```

Basically, quick orders supply stock answers to some of the prompts required to make an order. For example, if we filled in the values for the placeholder EKG, Portable, we might answer the following questions in the quick order template:

```
Consult to Service/Specialty:  Cardiology
Category: Inpatient
Place of Consult: Bedside
```

These three prompts are then excluded when you select EKG from the orders screen—relieving you of the necessity of filling in answering several prompts.
The other four prompts, Reason for the Request, Urgency, Attention, and Provisional Diagnosis, are all left blank in the quick order template. The answer to these questions change every time we place an order for a portable EKG. These four questions are the only ones asked when you place an order for "EKG, Portable."

Using the Consults Package with TIU
Direct TIU Input

On page 26 are the directions for entering results from the Consult/ Result Tracking screen. You can also enter results directly from TIU. This may be preferable if you are doing large volumes of consults or it fits your office work flow.
The basic steps to entering findings through TIU given here are. The interested user should look at the *TIU Clinical Coordinator & User Manual* for further information.

1. From TIU, choose Integrated Document Management.

As with almost everything in V*IST*A, exactly how you do this depends on how your system is set up. If you cannot find this option on your menu, consult your ADPAC. Example:

```
Select Progress Notes/Discharge Summary [TIU] Option: ?

   1      Progress Notes User Menu ...
   2      Discharge Summary User Menu ...
   3      Integrated Document Management ...
   4      Personal Preferences ...

Enter ?? for more options, ??? for brief descriptions, ?OPTION for help text.

Select Progress Notes/Discharge Summary [TIU] Option: 3  Integrated Document
Management

                            --- Clinician's Menu ---

Select Integrated Document Management Option:
```

2. Select Enter/edit Document.

Example:

```
Select Integrated Document Management Option: ?

   1      Individual Patient Document
   2      All MY UNSIGNED Documents
   3      Multiple Patient Documents
   4      Enter/edit Document

Enter ?? for more options, ??? for brief descriptions, ?OPTION for help text.

Select Integrated Document Management Option: Enter/edit Document
```

3. Enter the patient's name.

Follow the usual V*IST*A conventions for selecting a patient.

Example:

```
Select PATIENT NAME:     CPRSPATIENT,FIV       03-05-33     666332432     YES     SC
VETERAN
                        A: Known allergies
Select TITLE:
```

4. Select a document title.

Using the standard help functions (? or ??), you can see a list of titles that are available to you. Consult your supervisor or ADPAC about which one is appropriate to your situation.

Example:

```
Select TITLE: ?
 Answer with TIU DOCUMENT DEFINITION NAME, or ABBREVIATION, or
     PRINT NAME
 Do you want the entire TIU DOCUMENT DEFINITION List? Y  (Yes)
Choose from:
   ADVANCE DIRECTIVE      TITLE
   ADVERSE REACTION/ALLERGY      TITLE
   ASI-ADDICTION SEVERITY INDEX      TITLE
   BP TEST NOTE      TITLE
   CLINICAL WARNING      TITLE
   CRISIS NOTE      TITLE
   DISCHARGE SUMMARY      TITLE
   MEDICINE CONSULT      TITLE

Select TITLE: MEDICINE CONSULT          TITLE

Creating new progress note...
          Patient Location:  2B
    Date/time of Admission:  05/10/96 10:17
         Date/time of Note:  NOW
            Author of Note:  CPRSPROVIDER,SEVEN
   ...OK? YES//
You must link your Result to a Consult Request...

The following CONSULT REQUEST is available:
   1. JUL 16, 1997@06:08  278     PULMONARY
CHOOSE 1-1:
```

5. Choose the consult to enter findings.

TIU lists one or more active consults for the patient. Select the one you have findings for. Example:

```
The following CONSULT REQUEST is available:
   1. JUL 16, 1997@06:08  278     PULMONARY
CHOOSE 1-1: 1  278

Calling text editor, please wait...
  1>
```

6. Enter and edit findings.

TIU enters the editor specified in your V*IST*A personal preferences. There are a number of alternate ways to enter findings in TIU. Consult the *TIU Clinical Coordinator & User Manual* for details.

Example:

```
Calling text editor, please wait...
  1> No significant findings. Suggest respiratory therapy.
  2>
EDIT Option:

Saving MEDICINE CONSULT with changes...

Enter your Current Signature Code:
```

7. Sign the findings.

At the prompt, enter your signature code. If you do not sign the document at this time, VISTA generates an alert to remind you to sign it at a later time.
There is a detailed discussion of electronic signatures under step 2, *Sign the Consult*.

8. Repeat for other patients.

After TIU accepts your signature, it prompts you for another patient name.
Example:

Enter your electronic signature here.

```
Enter your Current Signature Code: SIGNATURE VERIFIED..

You may enter another CLINICAL DOCUMENT. Press RETURN to exit.

Select PATIENT NAME:
```

☞ **Note:** **If your site supports the dictation and transcription of Consult results, you may also use the batch upload facility of TIU to support single-point transfer of Consult results in mixed batches (with Discharge Summaries, Progress Notes, etc.) for either in-house or contract transcription services.**

Correcting Misdirected Results

Occasionally a consult result is linked to the wrong consult. If this is detected prior to signature, it is possible for the author of a consult result to re-direct the record to a different consult request by any of several methods, as illustrated in the examples below:

- Through the Link to Request action, when processing the alert for the unsigned consult result:
- Through the Individual Patient Document option (which is identical to the Browse action, accessible by a number of familiar paths from TIU Clinician's options, or through the CPRS LM Chart).
- You may choose the Link action from the All My Unsigned Documents Option.
- From the CPRS Chart.

Following signature, such corrections can only be made by those persons who are granted permission to do so under the Authorization/ Subscription Utility (ASU). Information on how to make this kind of correction is contained in the Consult/Request Tracking Technical Manual.

Examples:
You may redirect a consult result through the Link to Request action, when processing the alert for the unsigned consult result:

```
                          --- Clinician's Menu ---

   1      Progress Notes User Menu ...
   2      Discharge Summary User Menu ...
   3      Integrated Document Management ...
   4      Personal Preferences ...

Select Progress Notes/Discharge Summary [TIU] Option: VA  View Alerts

Using the Consults Package with Medicine

If your site is set up for attaching Medicine results to consults, and there are results available, then Consults prompts you to attach relevant results during the Complete/Update action.

In this example, we attach medicine results to a consult we are completing:

```
CONSULT TRACKING               Jun 21, 2000 14:23:01          Page:    1 of    3

```

Notice that when we tried to complete a consult with available Medicine results, Consults prompted us, “Attach Medicine Results?” By responding affirmatively we are presented a

screen with a list of the qualifying Medicine results and the ability to both explore these results and attach one or more of them to the consult.
For this to happen, two things must have taken place:

1. Your CAC or IRM must have defined certain procedures as qualifying to provide results to your service.

2. Those procedures must have been performed on your patient and the results entered into VistA.

In the following example, a medicine result is associated with the current consult and the complete action is finished:

```
Procedure/Medicine Resulting  Jun 21, 2000 14:29:50          Page:   1 of    1

Notice that after we exited the Procedure/Medicine Resulting screen, we were prompted about entering a note. If we had responded with a Yes, we would have been able to attach a TIU note to the consult we were closing in addition to the Medicine results.

Using the Consults Package with Clinical Procedures

Individual consult types can be designated to be resulted with the Clinical Procedures package. If this is the case, then Consults expects clinical procedures results to be attached to the consult. This attachment is usually accomplished with the CPUser program.

If the instrument in question has not yet been connected to Clinical Procedures, then the consult may be completed in the usual way by an authorized provider. (Authorized providers being clinicians whom the CAC has set up as an interpreter for the appropriate service.) In this case Consults will filter the note titles available and only allow you to use Clinical Procedures titles.

When the clinical procedure results are present, Consults changes the status to PR (partial results). This means that, at least, at stub of a TIU document has been attached to the consult. It could also mean that one or more images and/or instrument reports created by a clinical device are also attached to the consult. Additionally, the interpretation of the clinical device image(s) or text may have been uploaded and is ready for signature.
The minimum required by the consults package to complete a clinical procedures consult is the interpretation of the clinical device output. If this is not supplied via upload, then it must be entered by the consulting clinician. When this interpretation is entered, the following fields are required and are prompted for (if not already present):

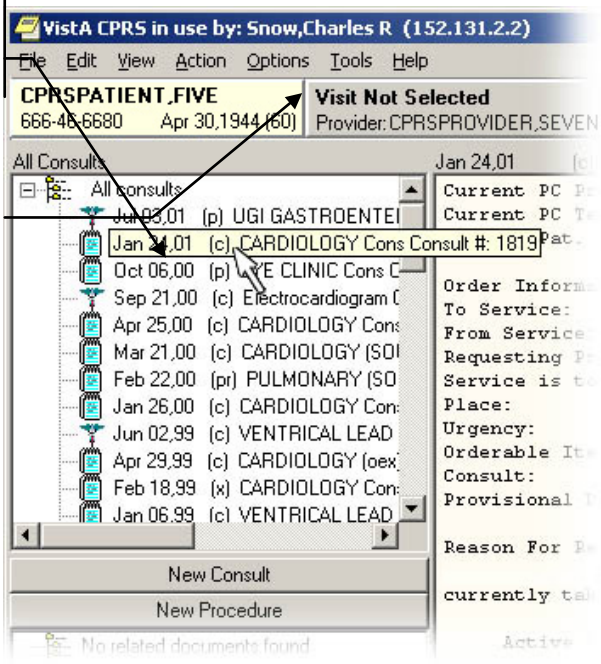
Key

1. Steps are numbered and bolded:

a) Sub-steps are lettered and include an accent bar.

Tips are in a plain box

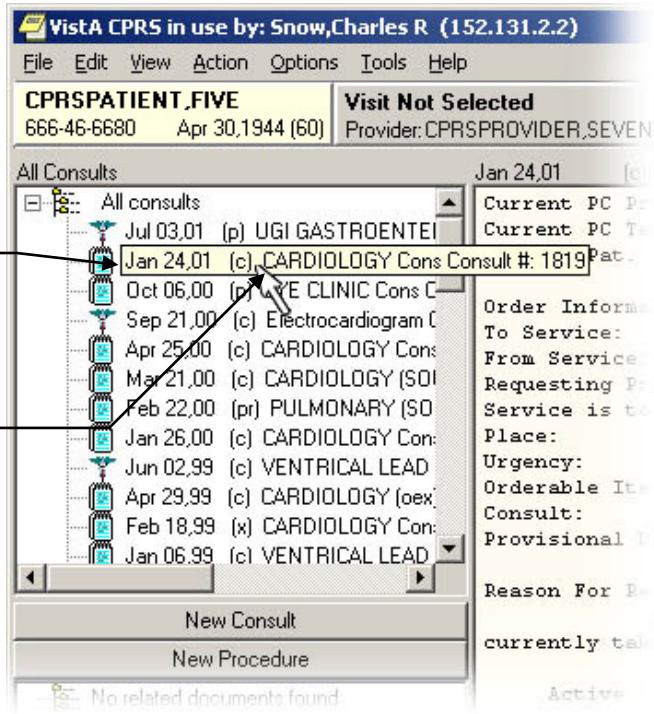


Introduction

1. Before each process, select the consult:

a) Click on the consult you want to select. (Most processes assume that you have first selected a specific consult.)

When you pause the cursor over the list of consults, CPRS expands the line the cursor is on.



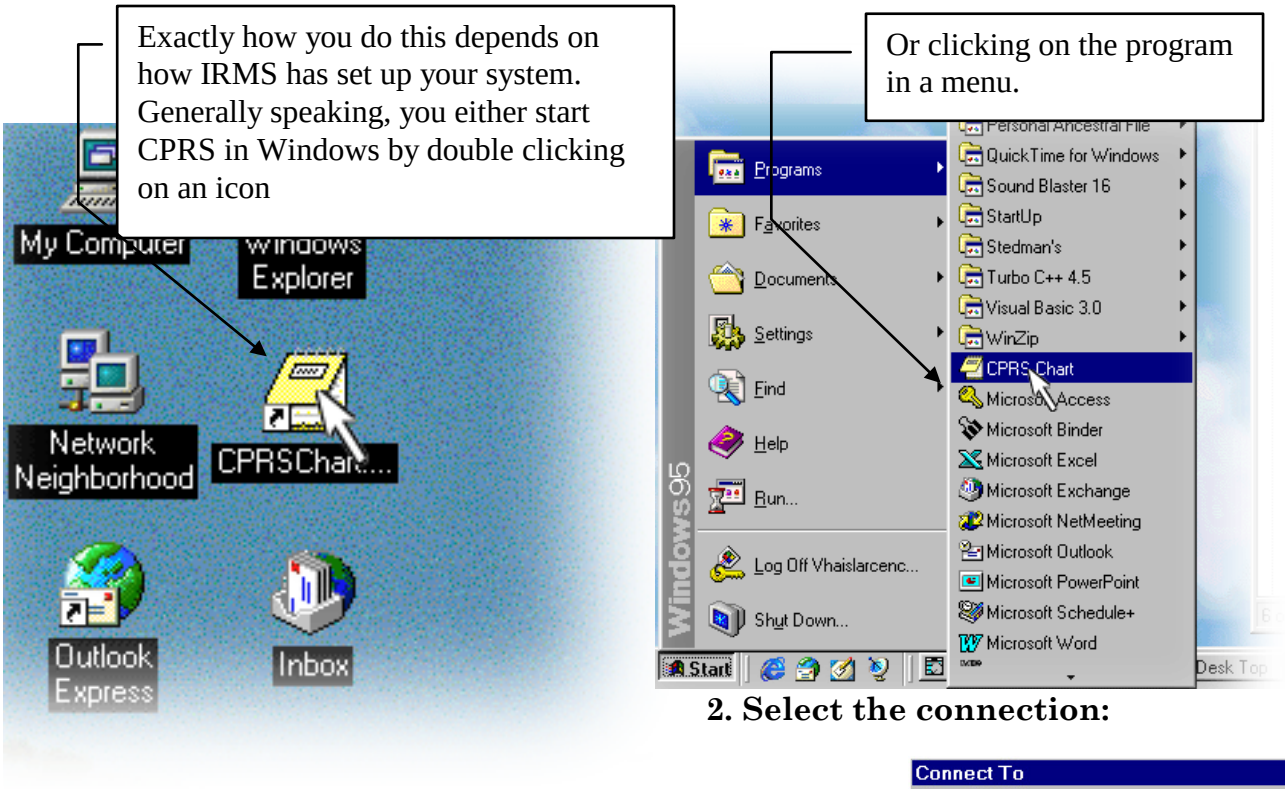
Windows Flow of Information

Starting Consults in Windows

1. Start CPRS for Windows:

Exactly how you do this depends on how IRMS has set up your system. Generally speaking, you either start CPRS in Windows by double clicking on an icon

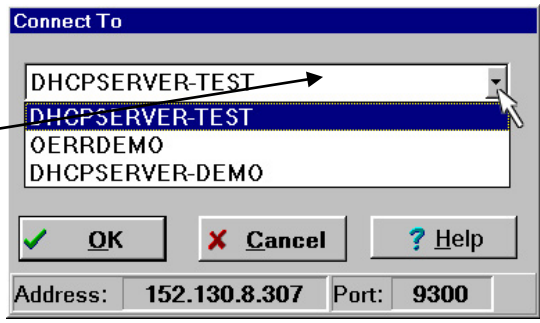
Or clicking on the program in a menu.



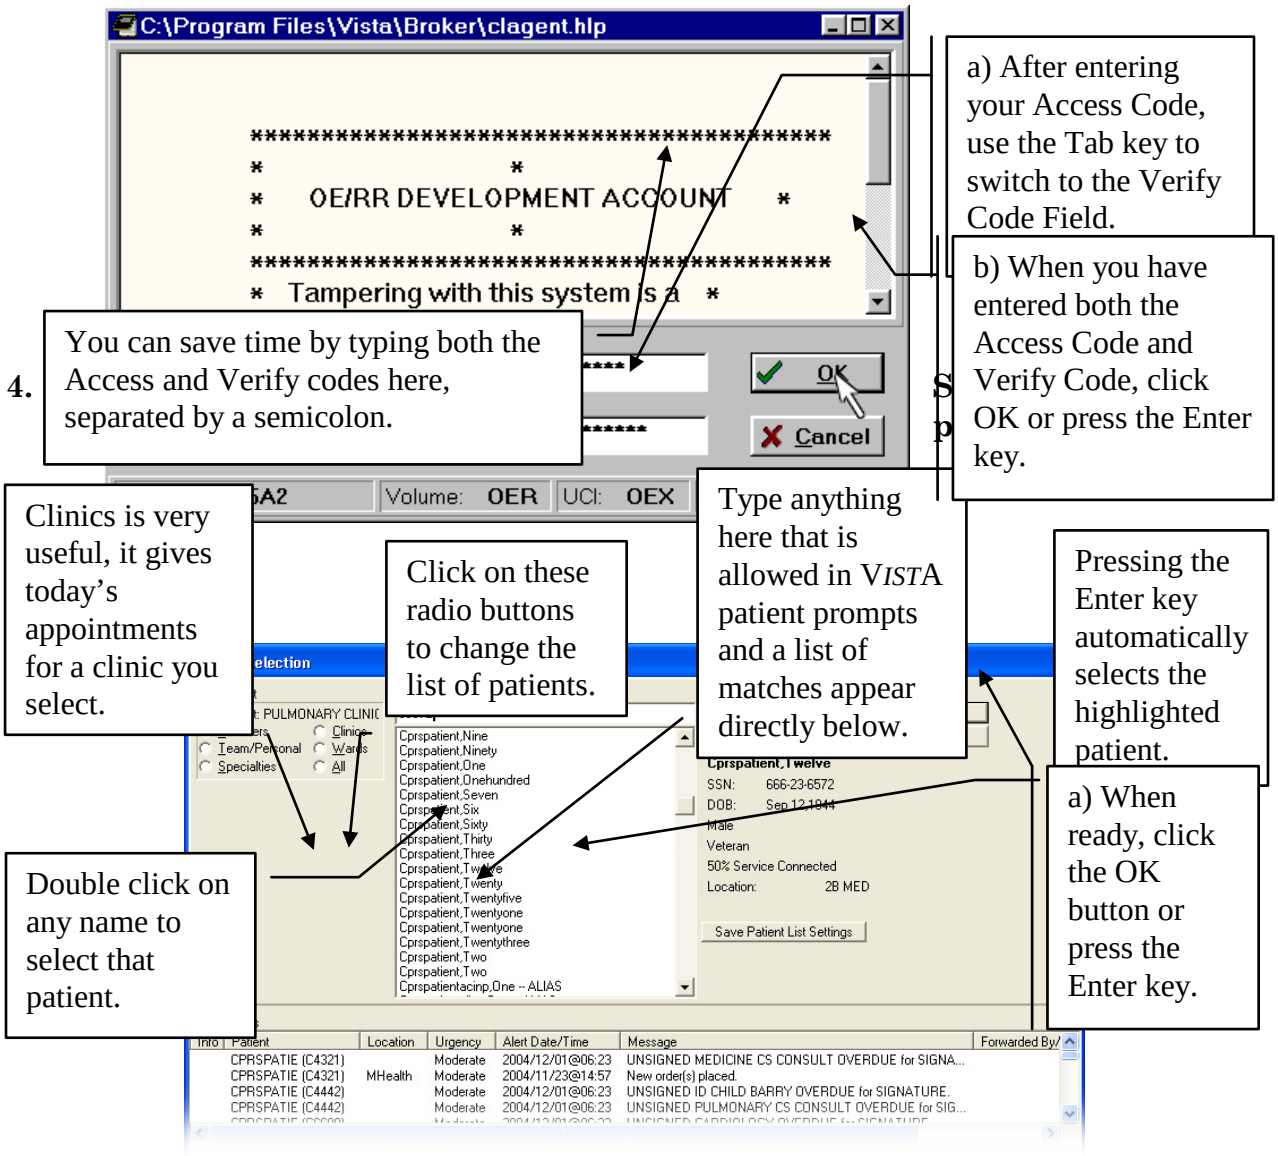
2. Select the connection:

Note: Depending on the way CPRS is installed on your machine, you may not see this step

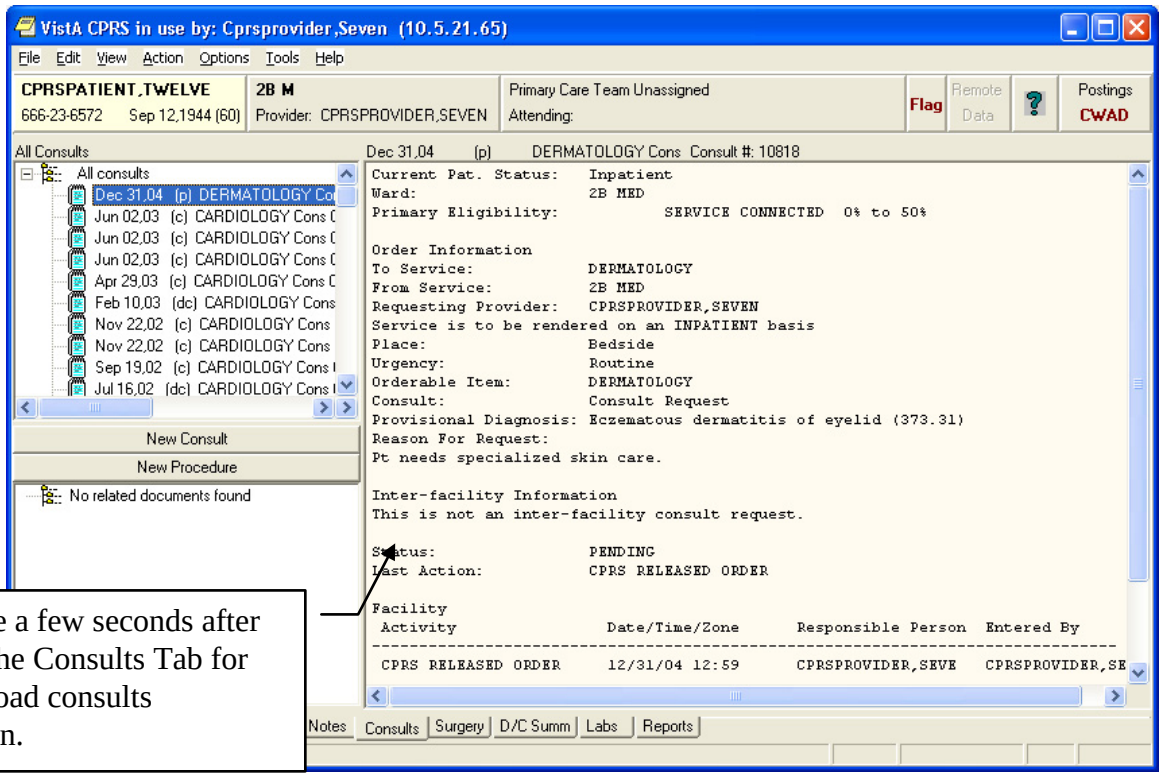
Click on the drop-down button
Select the appropriate connection. (See your Clinical Application Coordinator for information on which is the correct one.)
Click OK.



3. Log-on to your system:



5. Click the Consults Tab:



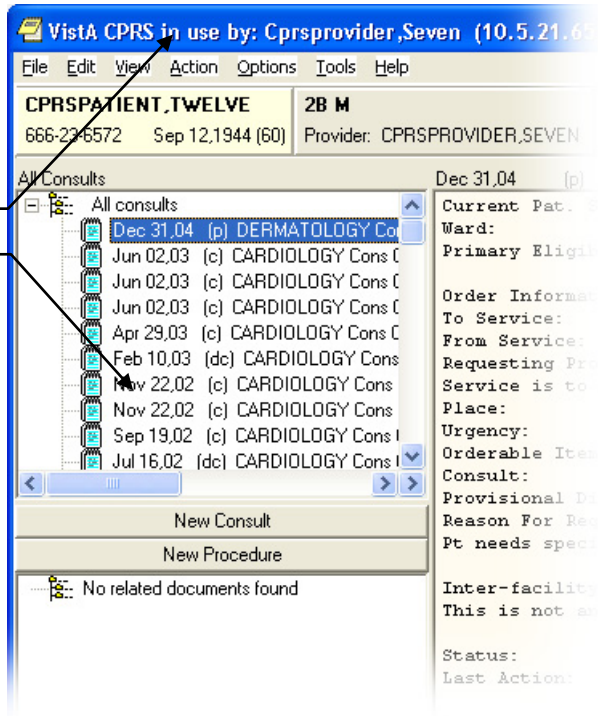
It may take a few seconds after selecting the Consults Tab for CPRS to load consults information.

Order New Consult

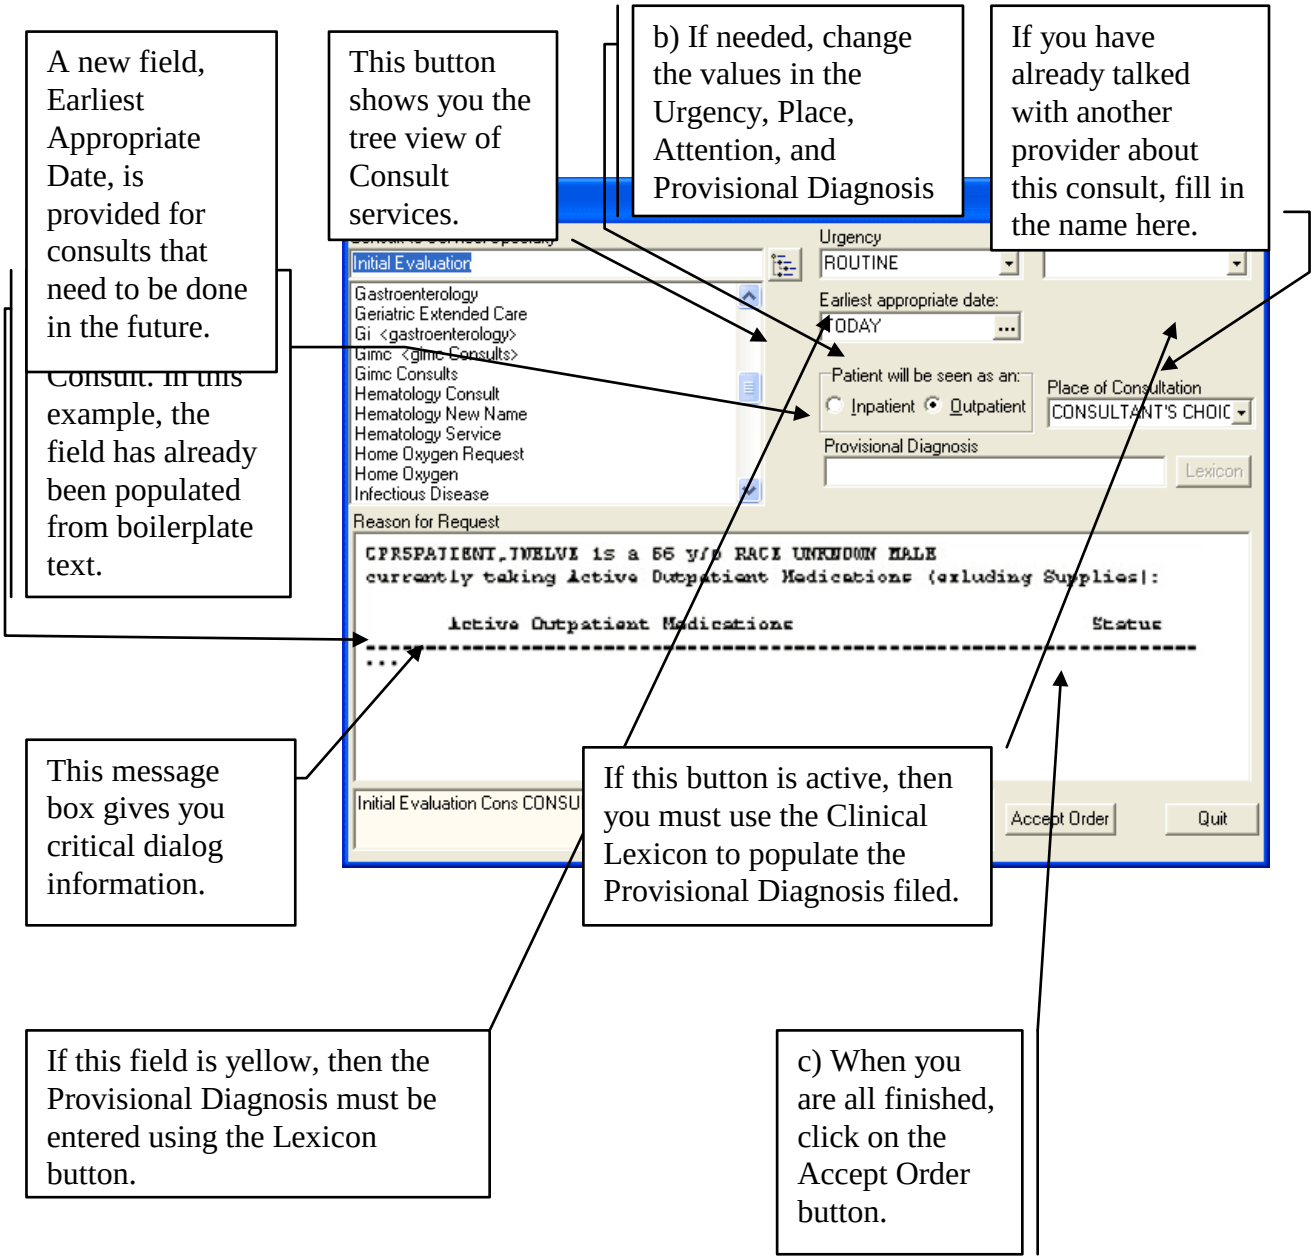
1. Select New Consult:

You can find New Consult on the Action menu.

New Consult Button.



2. Fill out the Order a Consult dialog:

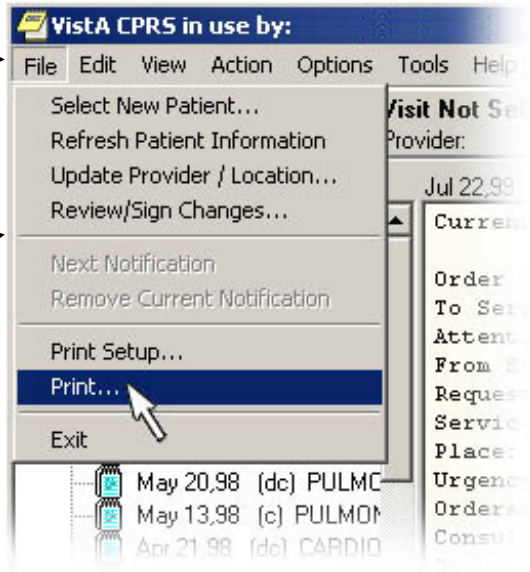


Print Form 513

1. Select Print from the File Menu:

Select Print by clicking on File in the menu bar, then clicking on Print.

Or follow the underlined letters from the keyboard by pressing Alt+F (together) then P.



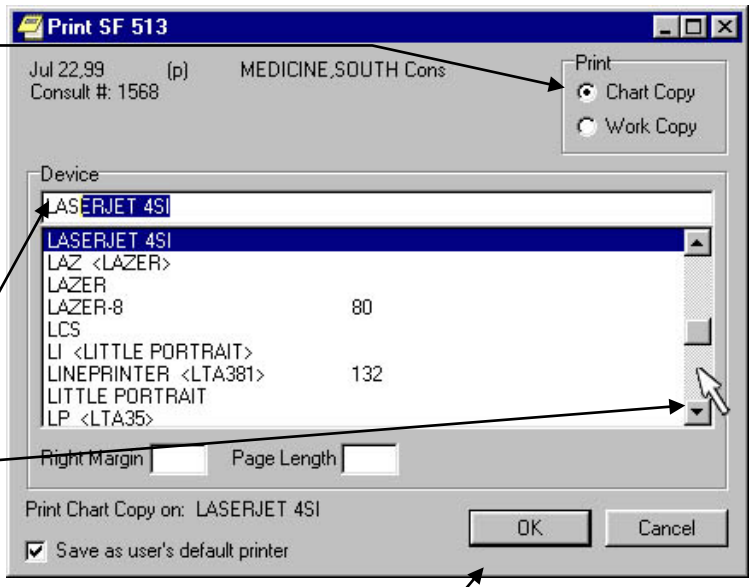
2. Select the Printer Device:

a) Select Chart Copy or Work Copy.

b) Start typing the device name, CPRS finds the closest match.

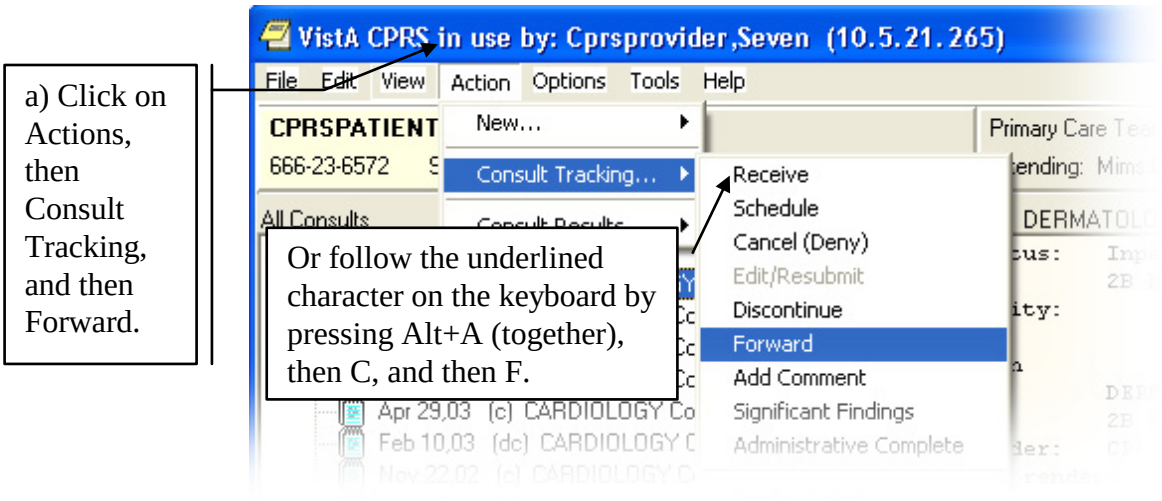
c) Or use the scroll bar and then click on the printer you want.

d) Then click OK or press the Enter key.

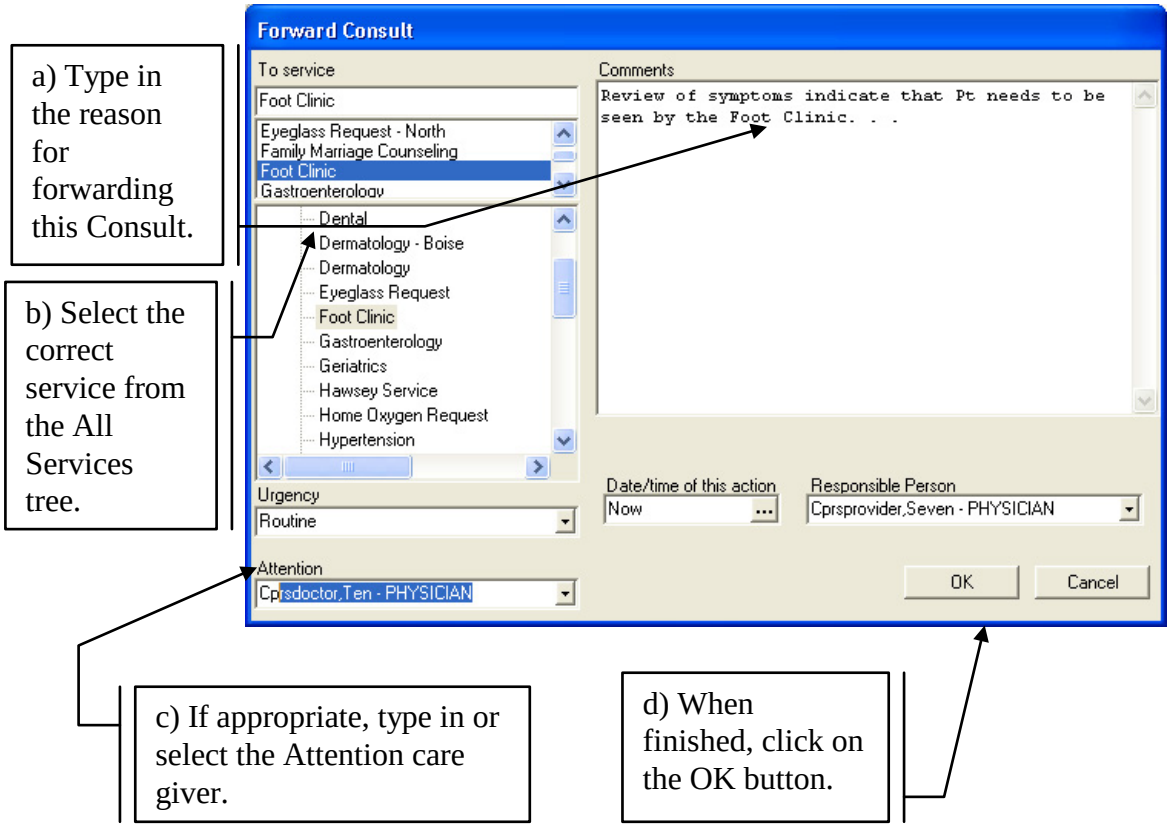


Forward Request

1. Select Forward:



2. Fill in the Forward Consult dialog:

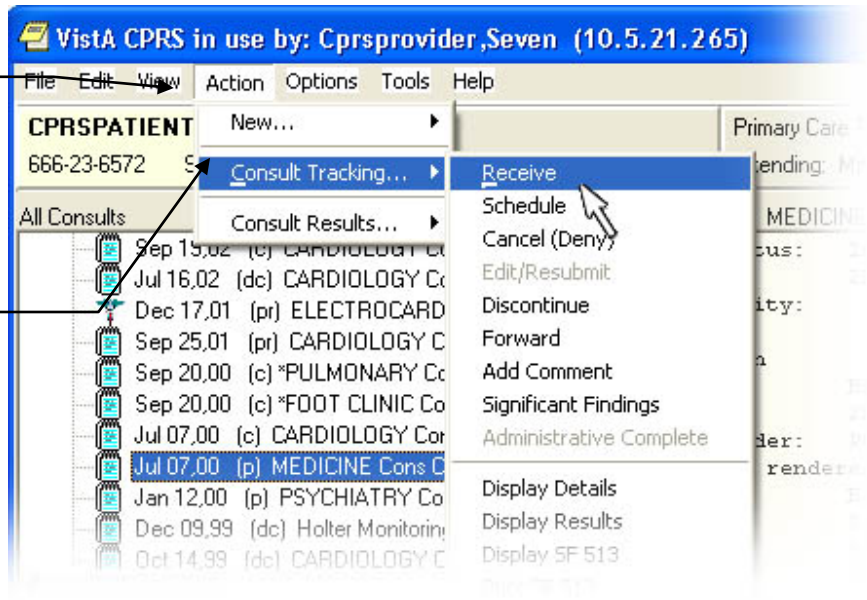


Receive Request

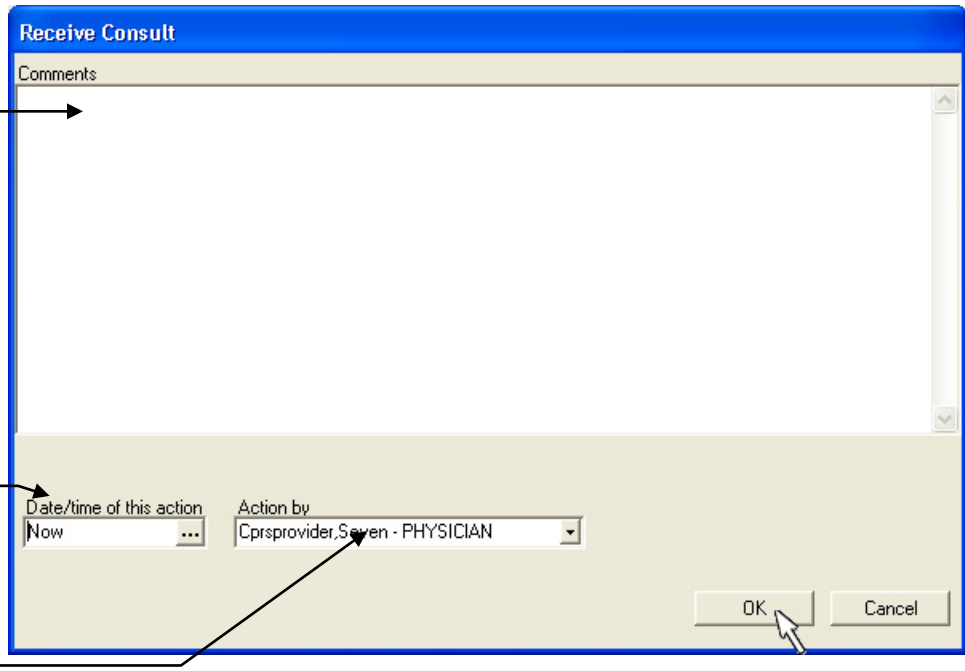
1. Select Receive:

a) Click on Action, then Consult Tracking, then Receive.

Or use the keyboard by pressing the underlined characters: Firs Alt and A (together), then C, and then R.



2. Click OK.



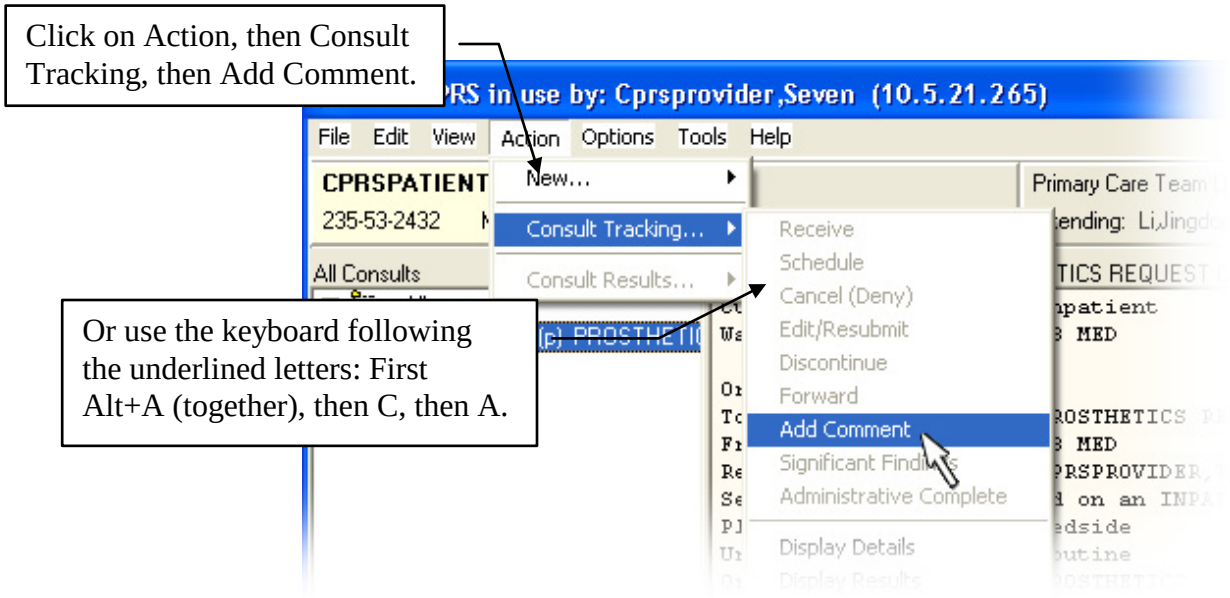
If there is anything unusual about this consult, document it by typing a comment here.

If you need some other time, click here.

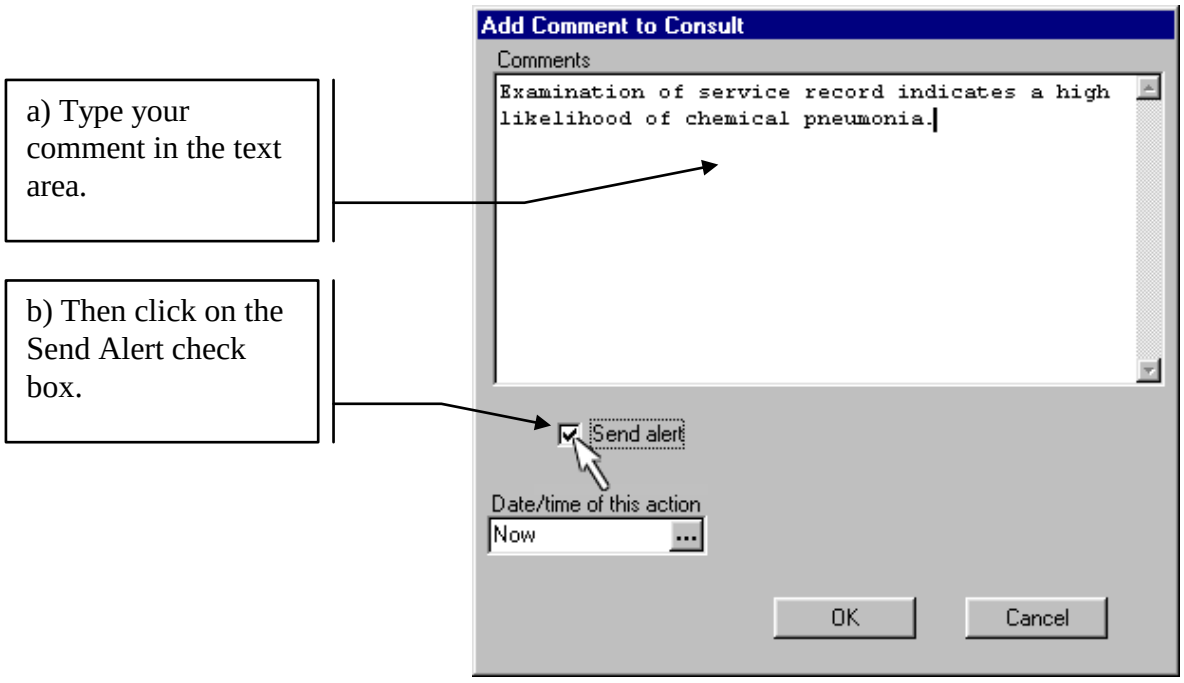
If the action should be by some other person, change this.

Comment

1. Select Add Comment:



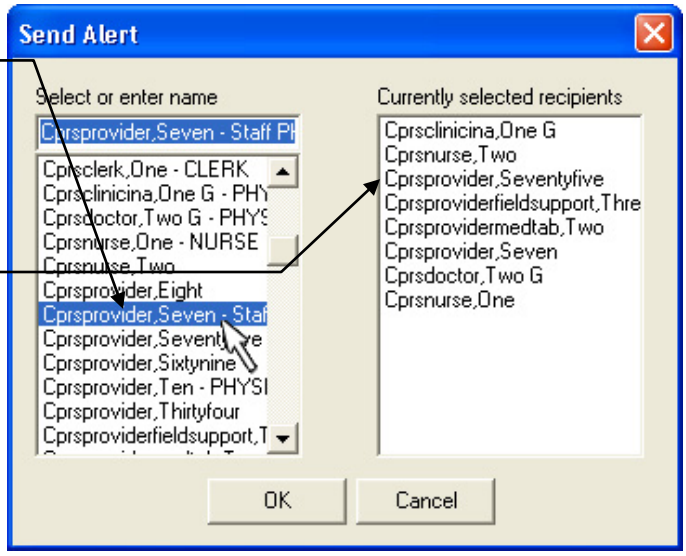
2. Fill in the Add Comment to Consult Dialog:



3. Select the People to Receive the Alert:

Clicking in this list selects people to receive the alert.

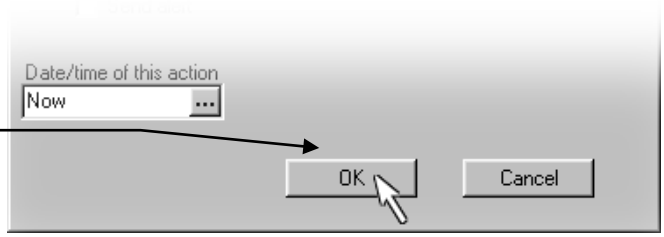
Clicking in this list removes people from the recipients list.



Note: **If this were an Inter-Facility Consult, individuals from the other facility involved would not be on this list. In this case, the Notification System decides who to notify at the other facility by referring to Consults files.**

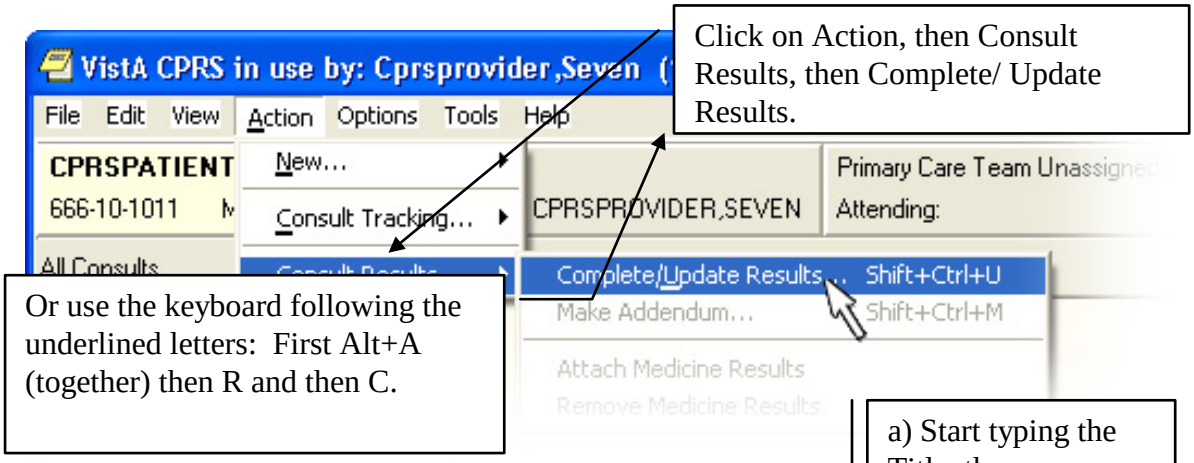
4. Select OK:

a) When finished, click the OK button.



Complete a Consult (From the Consults Tab)

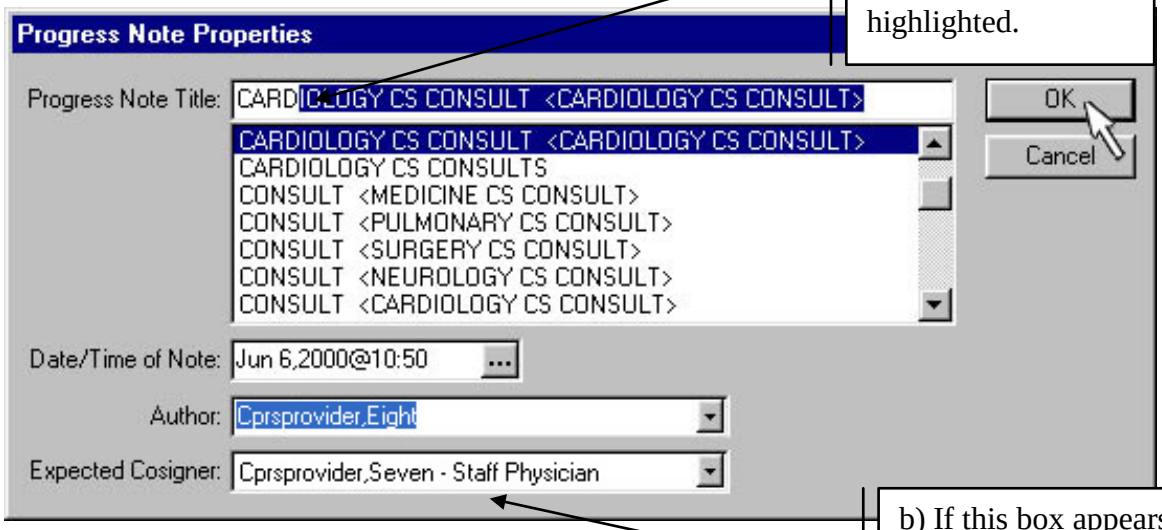
1. Select Complete/Update Results:



Click on Action, then Consult Results, then Complete/ Update Results.

Or use the keyboard following the underlined letters: First Alt+A (together) then R and then C.

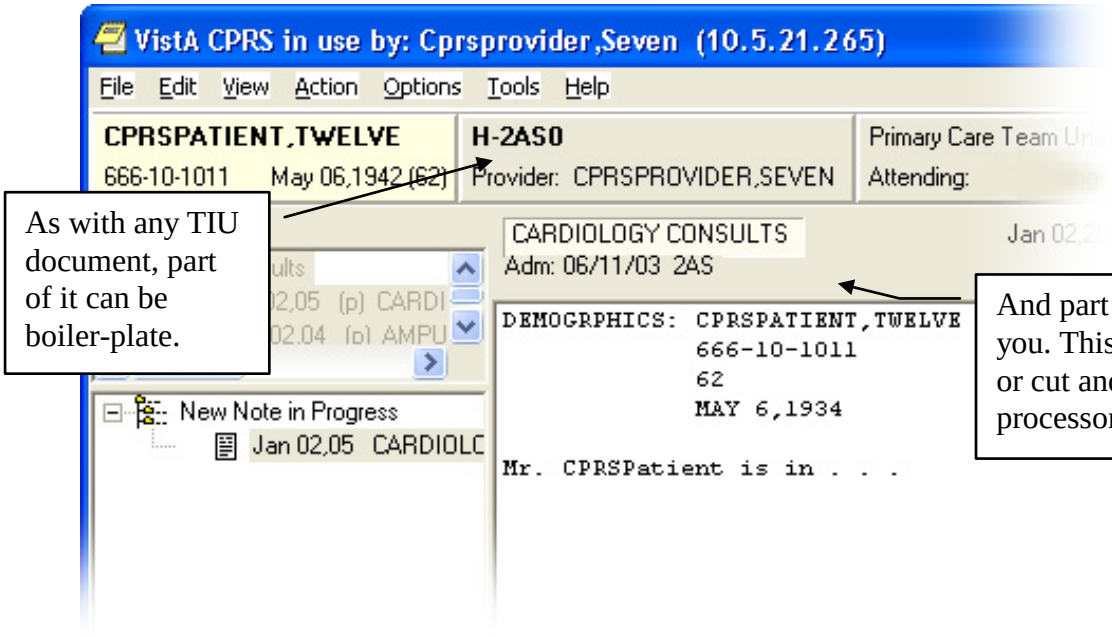
2. Select the Title of the Note:



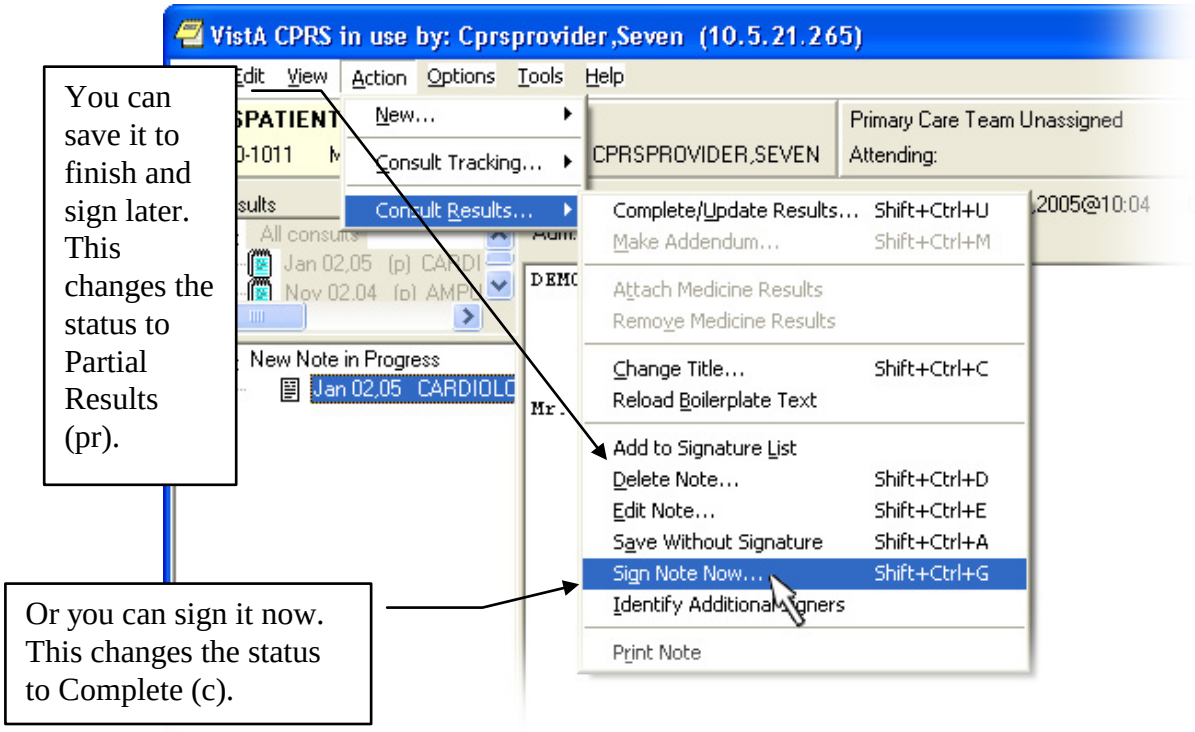
a) Start typing the Title, then press Enter when the correct Title is highlighted.

b) If this box appears, you also need to fill in the Expected Cosigner.

3. Type in the text of the results:



4. Save the note:

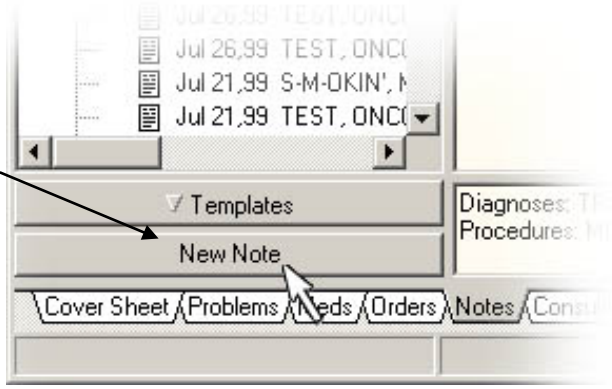


Complete a Consults (From the Notes Tab)

Before starting, from the CPRS Windows program, select the correct patient and click the Notes tab.

1. Click New Note:

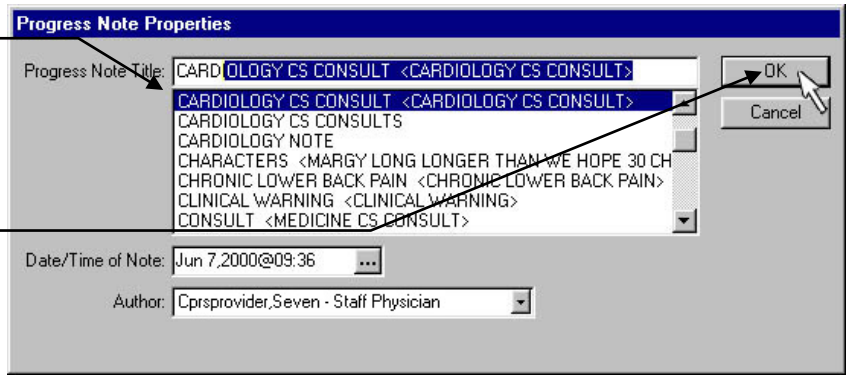
a) Click the New Note button.



2. Select the Title of the Note:

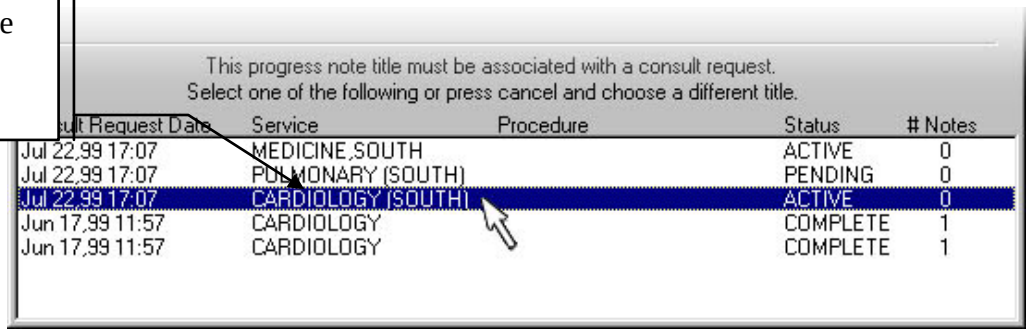
a) Type or select a title.

b) When finished, click OK.

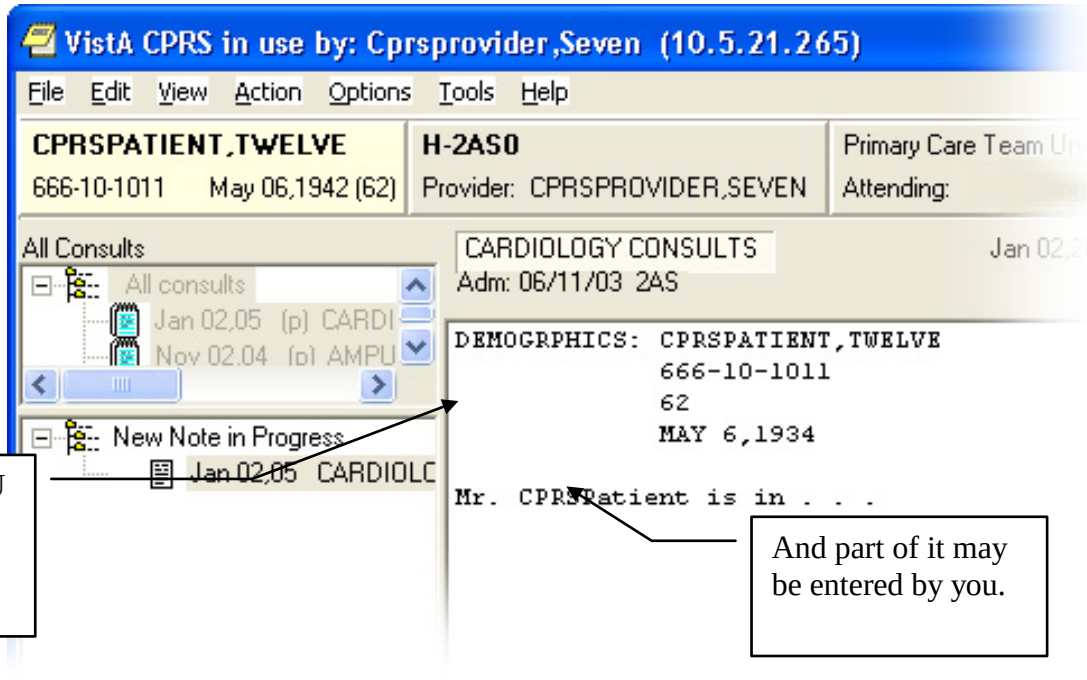


3. Select the consult:

a) Select the consult you are completing.



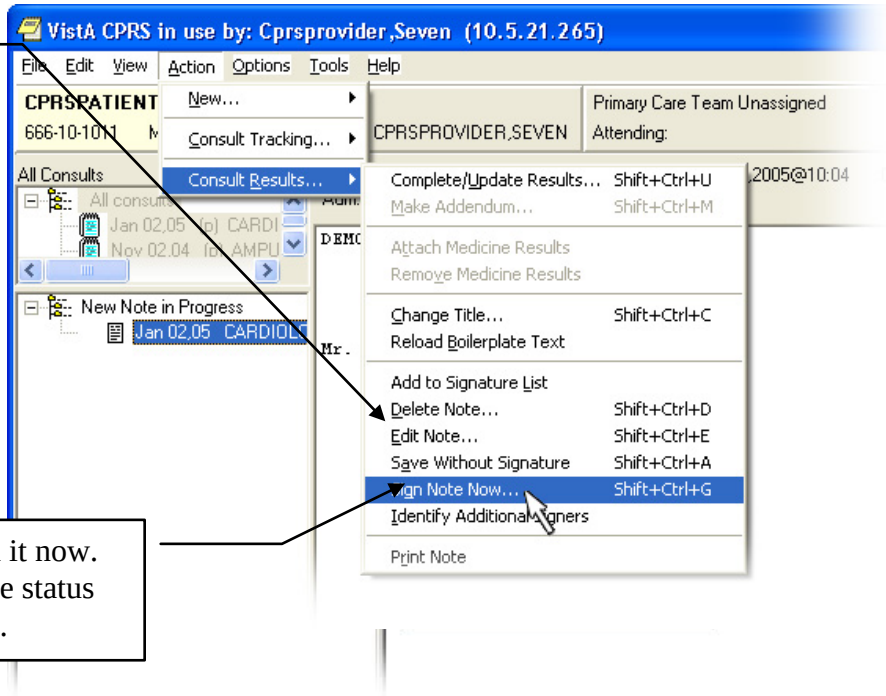
4. Type in the text of the results:



As with any TIU document, part of it can be boiler-plate.

And part of it may be entered by you.

5. Save the note:



You can save it to finish and sign later. This changes the status to Partial Results (pr).

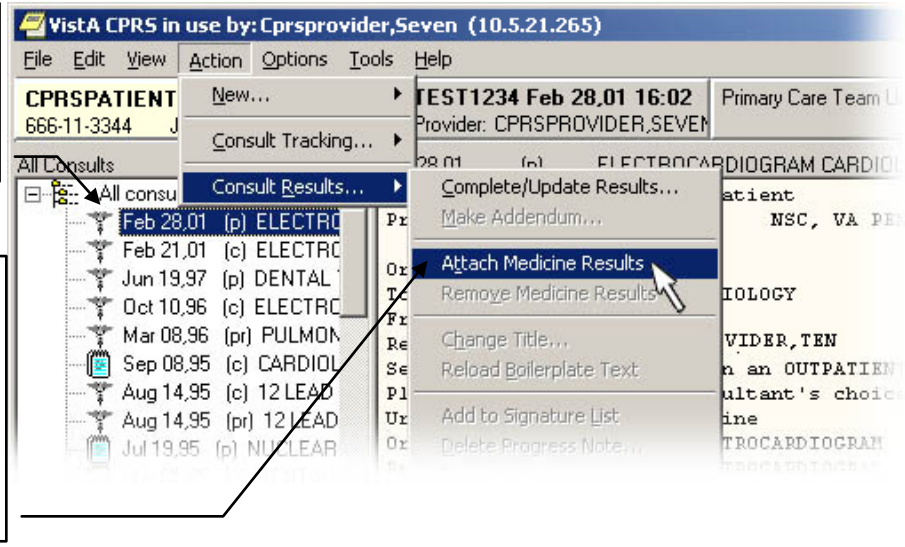
Or you can sign it now. This changes the status to Complete (c).

Complete a Consult (From the Medicine Results)

1. Select Attach Medicine Results:

Procedures are indicated by the medical icon.

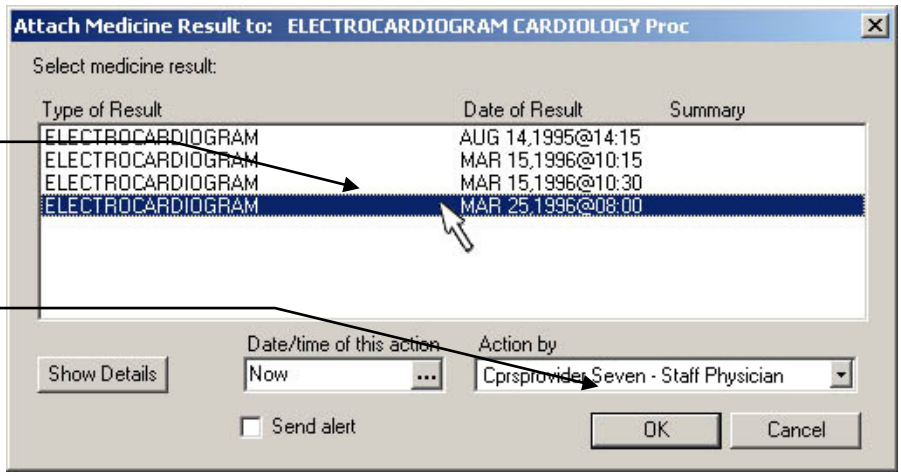
If medicine results are available for this patient, the menu command is turned on.



2. Select the medicine result.

Select the medicine result you want.

Click OK and you're done.

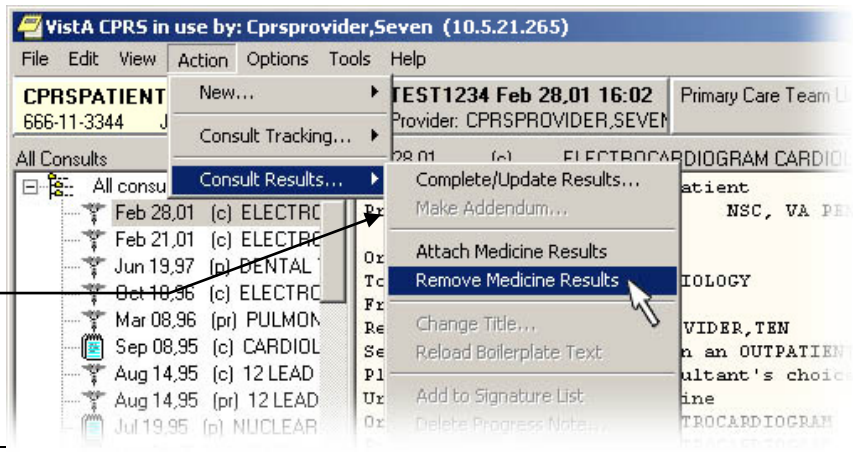


3. No signature is necessary at this time.

Undo Medicine Results

Select Remove Medicine Results

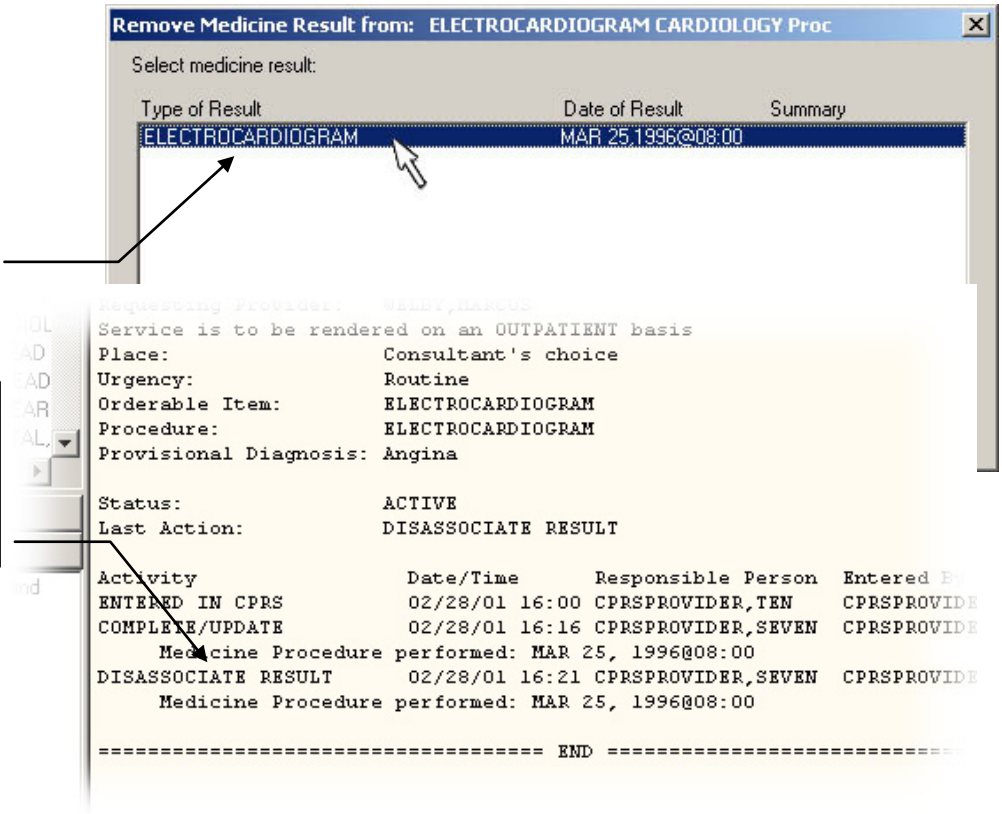
Windows activates this menu command when a result *you can* remove is present in the selected consult.



2. Select the medicine result to be removed.

If more medicine results are present, they will be listed here.

Consults keeps and displays a complete audit trail.

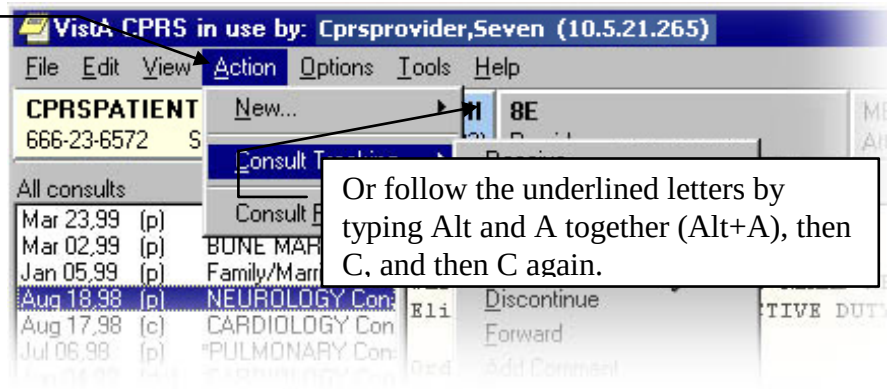


Other Windows Topics
Cancel (Deny) Request

This is a consult receiver's action. If you are the consult originator, use the Discontinue Order action.

1. Select Cancel:

Click on Action, then Consult Tracking, and then Cancel.

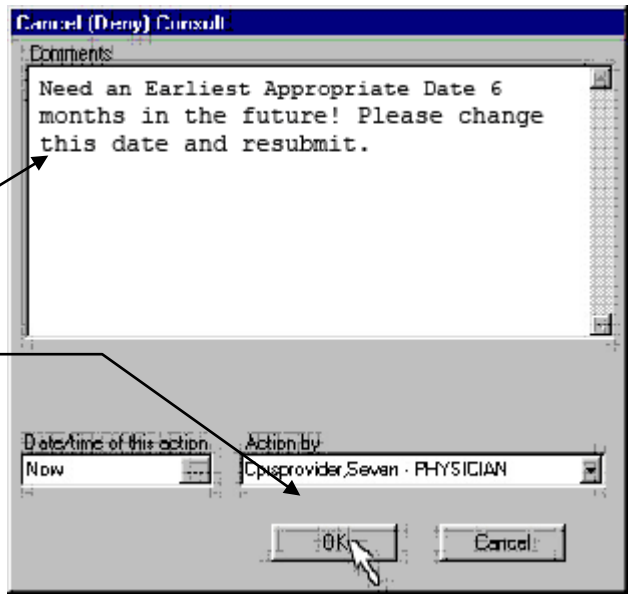


Or follow the underlined letters by typing Alt and A together (Alt+A), then C, and then C again.

2. Consult dialog:

a) Type the reason for the denial. Be specific enough so that the originating provider can correct and resubmit the consult.

b) When finished, click the OK button.

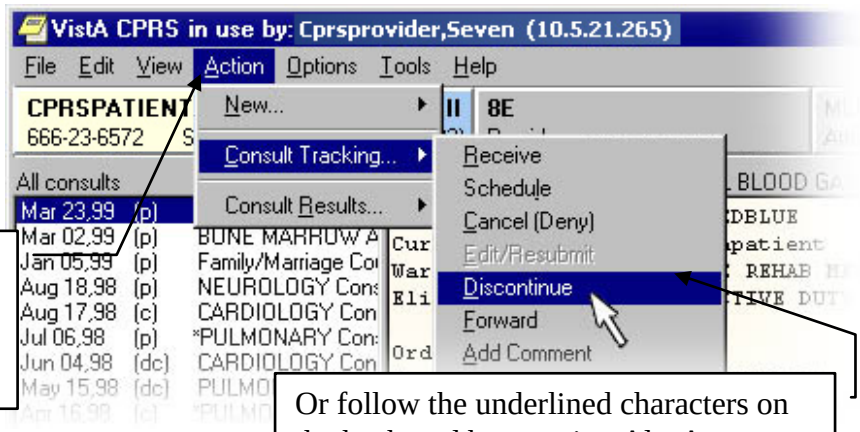


A notification is automatically sent to the consult originator so that the consult can be edited and resubmitted.

Discontinue Order

This is a consult originator's action. If you are the consult receiver, use the Cancel (Deny) action.

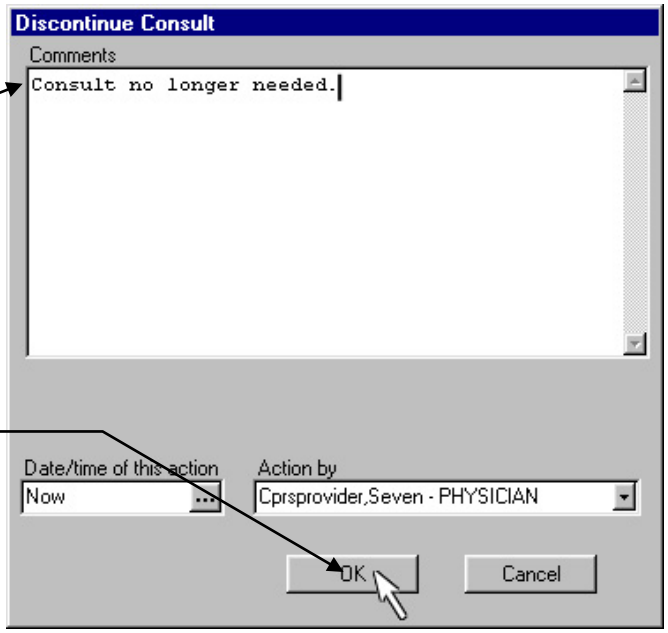
1. Select Discontinue:



Click on Action, then Consult Tracking, then Discontinue.

Or follow the underlined characters on the keyboard by pressing Alt+A (together), then C, and then D.

2. Fill out the Discontinue Consult dialog:



a) Type in the reason.

b) When finished, click the OK button.

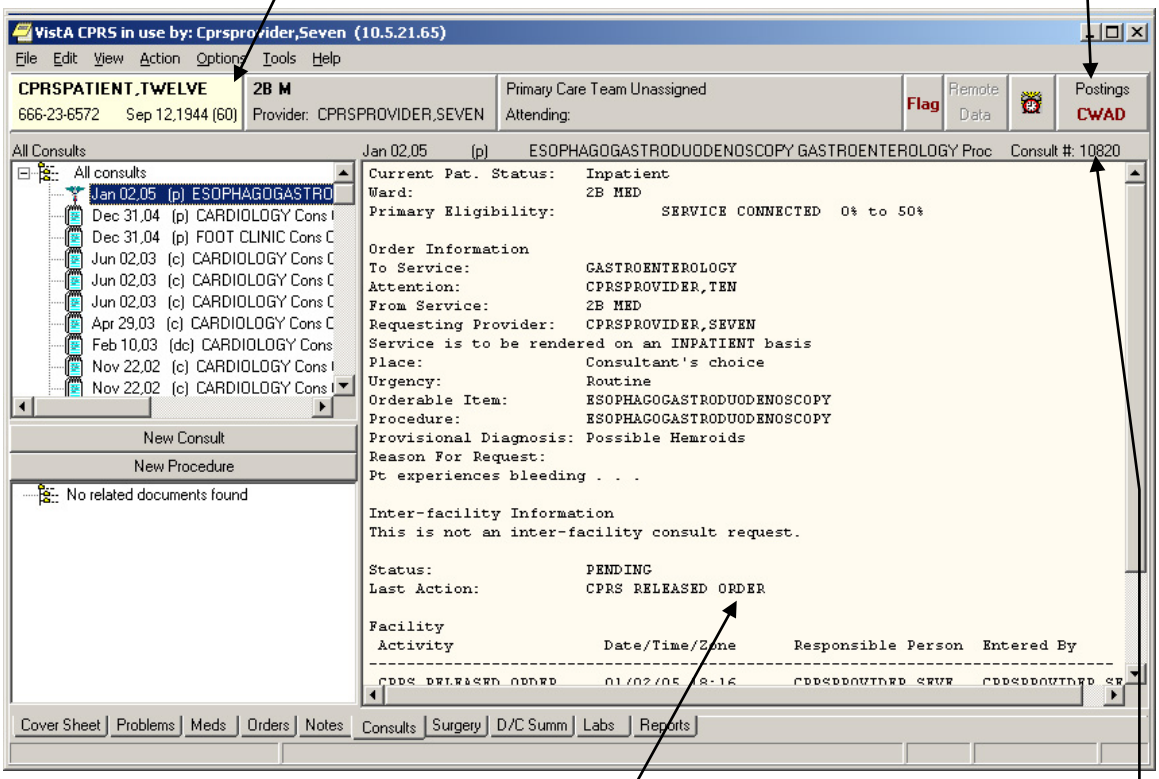
A notification is automatically sent to the originator of the consult with information about the discontinuation of the order.

Detailed Display

Consults in Windows always show the detailed display of whatever consult is selected.

a) Click on the consult you want to see.

Postings codes have the following meanings:
C–There are Crisis Note(s) present.
W—There are Clinical Warning Note(s) present.
A—There are allergies present.
D—There are Directive Note(s) present.
Click here for specifics.



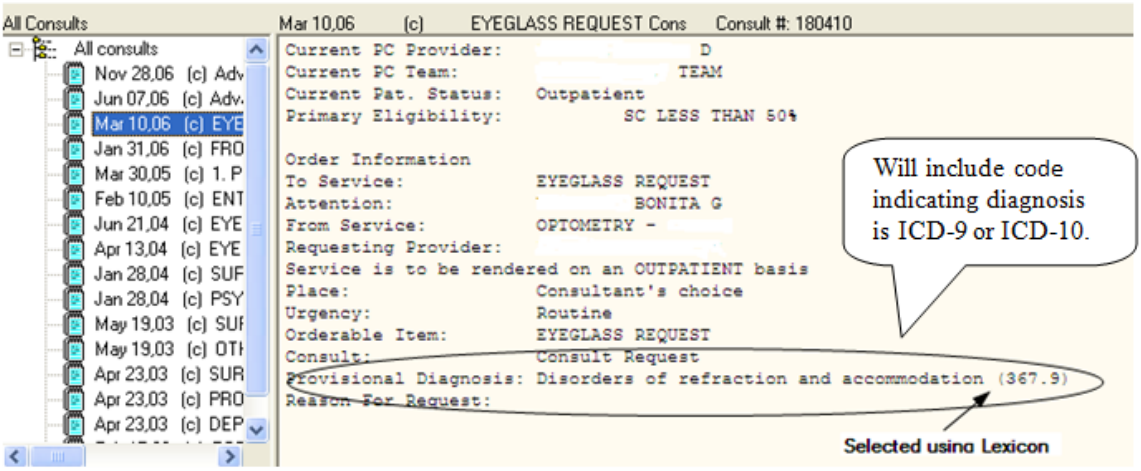
The Detailed Display includes:
Current Primary Care information.
Current Eligibility information.
Order information.
Last action information.
A record of activity.
All signed notes.
Information about unsigned notes.
Notes, Results, and Addenda
All other text fields associated with the consult.

The consult number can be used to quickly access a specific consult in a variety of situations.

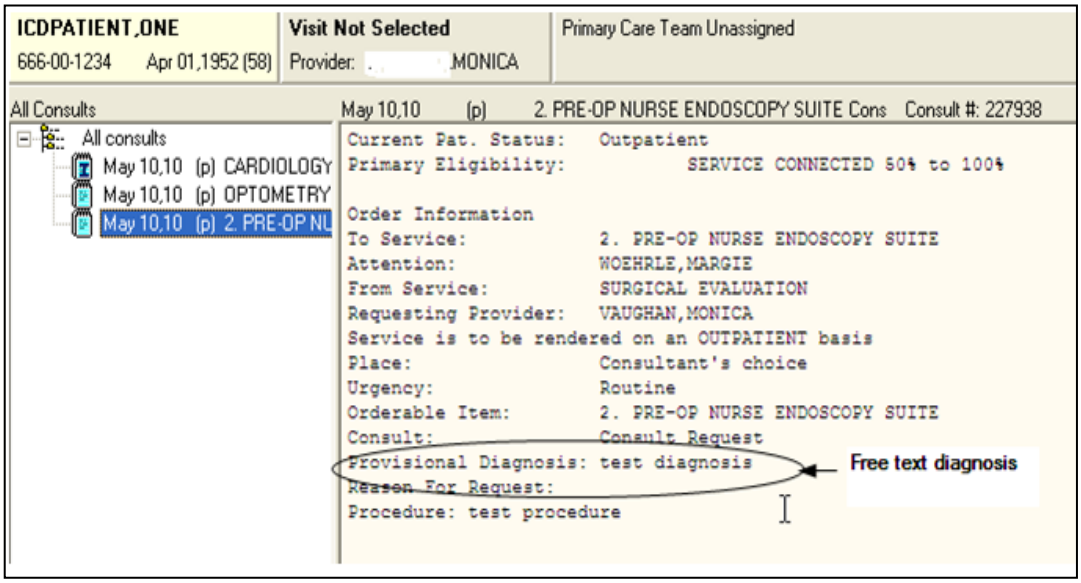
Changes made by Patch 73 for ICD-10 Remediation

ICD Diagnosis Code Display

ICD Diagnoses will be displayed on the user-selected Consults or Procedures.
If an existing consult (for which ICD-10 diagnosis was entered) is selected for display or the action Display Details is used, the ICD-10-CM diagnosis code and full description/definition will be displayed.



If the user selects an existing consult to display or uses the action Display Details and the Provisional Diagnosis was entered using free text data entry, the CRT package will not designate the diagnosis as ICD-9 or ICD-10.



The CRT package will display ICD Diagnosis on the display details of Consults/Procedures orders.

- If the user selects an order to display details and the Provisional Diagnosis was entered as an ICD-9 diagnosis using the Lexicon, the ICD-9 diagnosis code and description/definition will be displayed.
- If the user selects an order to display details and the Provisional Diagnosis was entered as an ICD-10 diagnosis using the Lexicon, the ICD-10-CM diagnosis code and full description/definition will be displayed.
- If the user selects an order to display and the Provisional Diagnosis was entered using free text data entry, then Consults will not designate the diagnosis as ICD-9 or ICD-10.
- If the user selects an existing consult to display and the Provisional Diagnosis was entered using the Lexicon then Consults will designate the particular diagnosis as ICD-9 or ICD-10.

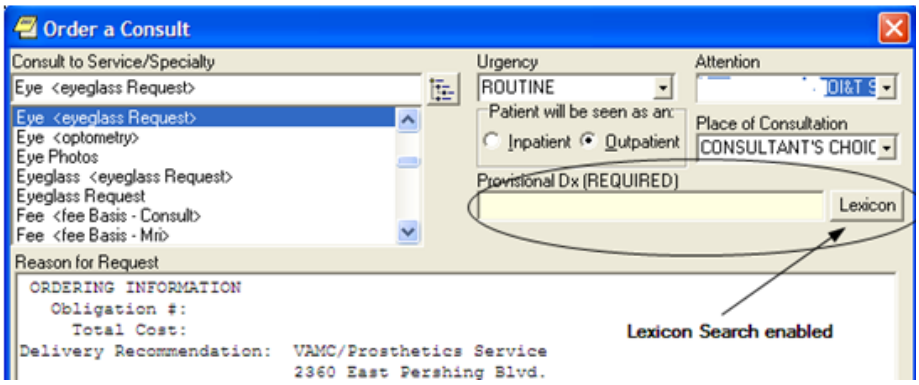
- ICD Diagnosis on the Display SF 513 action will be displayed for a particular Consults or Procedure.
  - If the user performs the action Display SF 513 for a consult or procedure for which ICD-10 diagnosis was entered, Consults will display the ICD-10-CM diagnosis code and full description/definition.
  - If the user performs the action Display SF 513 for a consult or procedure and the Provisional Diagnosis was entered using free text data entry, then Consults will not designate the diagnosis as ICD-9 or ICD-10.
  - If the user performs the action Display SF 513 for a consult or procedure and the Provisional Diagnosis was entered using the Lexicon, then Consults will designate the particular diagnosis as ICD-9 or ICD-10.

ICD Diagnosis Search

Consults will provide the ability to search on ICD-10-CM diagnosis full (expanded) text descriptions and codes.



- Consults will display ICD Diagnosis on the Display SF 513 action for a particular Consults or Procedure.
  - If the user performs the action Display SF 513 for a consult or procedure for which ICD-10 diagnosis was entered, Consults will display the ICD-10-CM diagnosis code and full description/definition.
  - If the user performs the action Display SF 513 for a consult or procedure and the Provisional Diagnosis was entered using free text data entry, Consults will not designate the diagnosis as ICD-9 or ICD-10.
  - If the user performs the action Display SF 513 for a consult or procedure and the Provisional Diagnosis was entered using the Lexicon, then Consults will designate the particular diagnosis as ICD-9 or ICD-10.

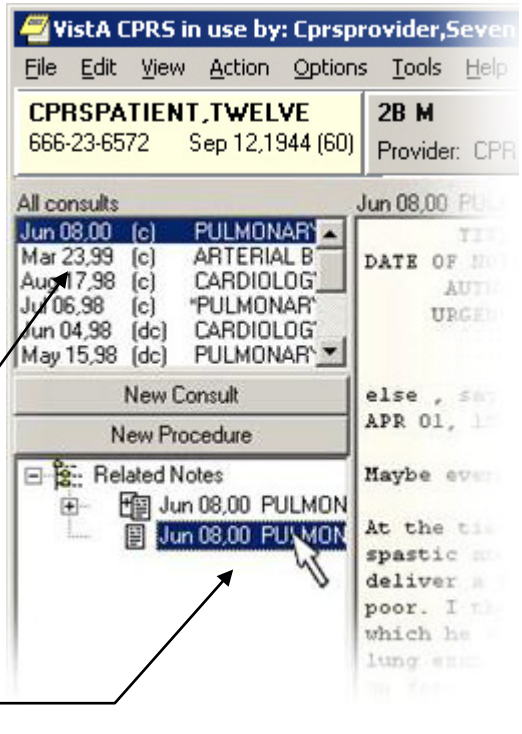
Make Addendum

An Addendum is a *medical* statement by a patient care professional about a specific Note. It differs from a Comment in that it is about medical matters, where Comments, which can be written by anyone, should contain information needed to *administer* the consult.

1. Select the Consult and the Note

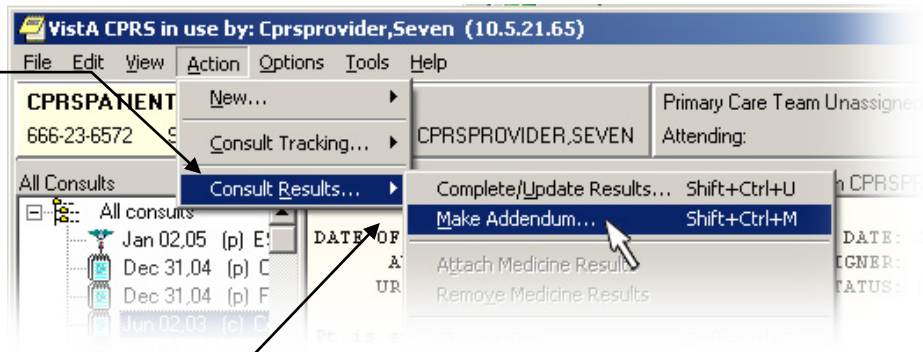
a) First click on the consult.

b) Then, select the note by clicking on it.



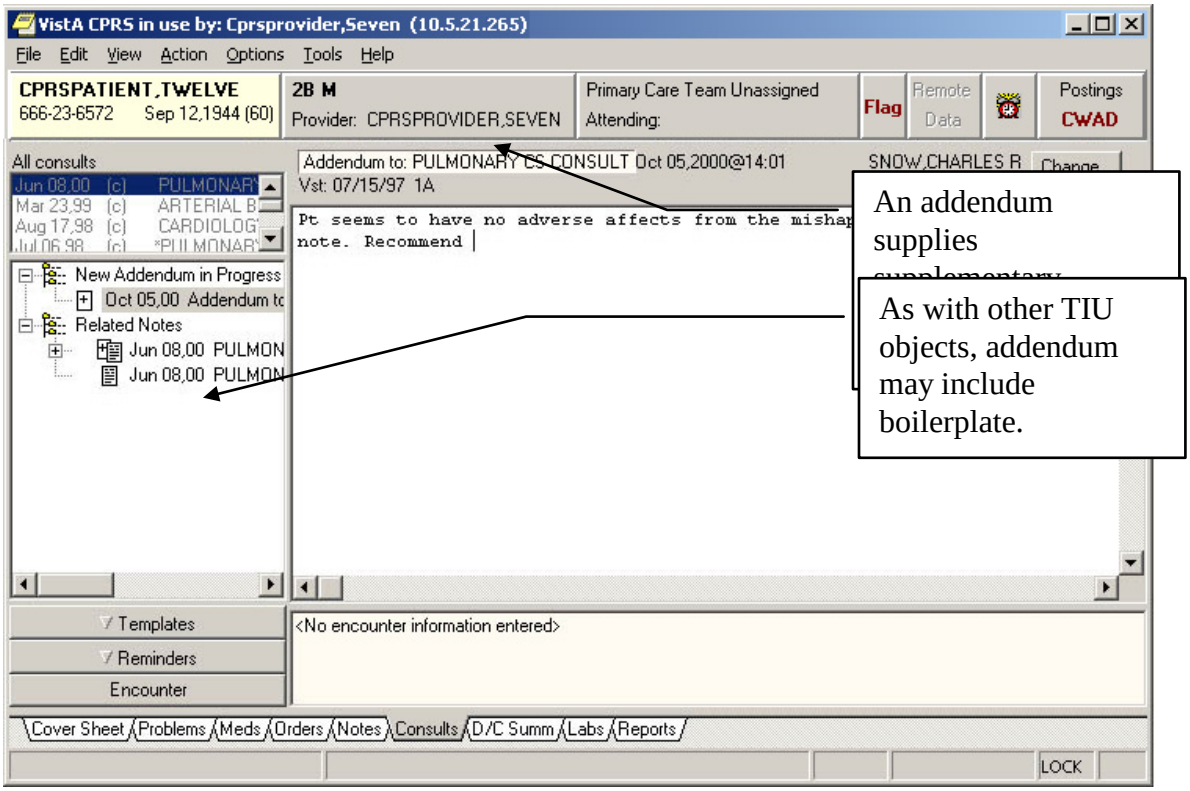
2. Select Make Addendum

Click on Action, then Consult Results, and then Make Addendum.

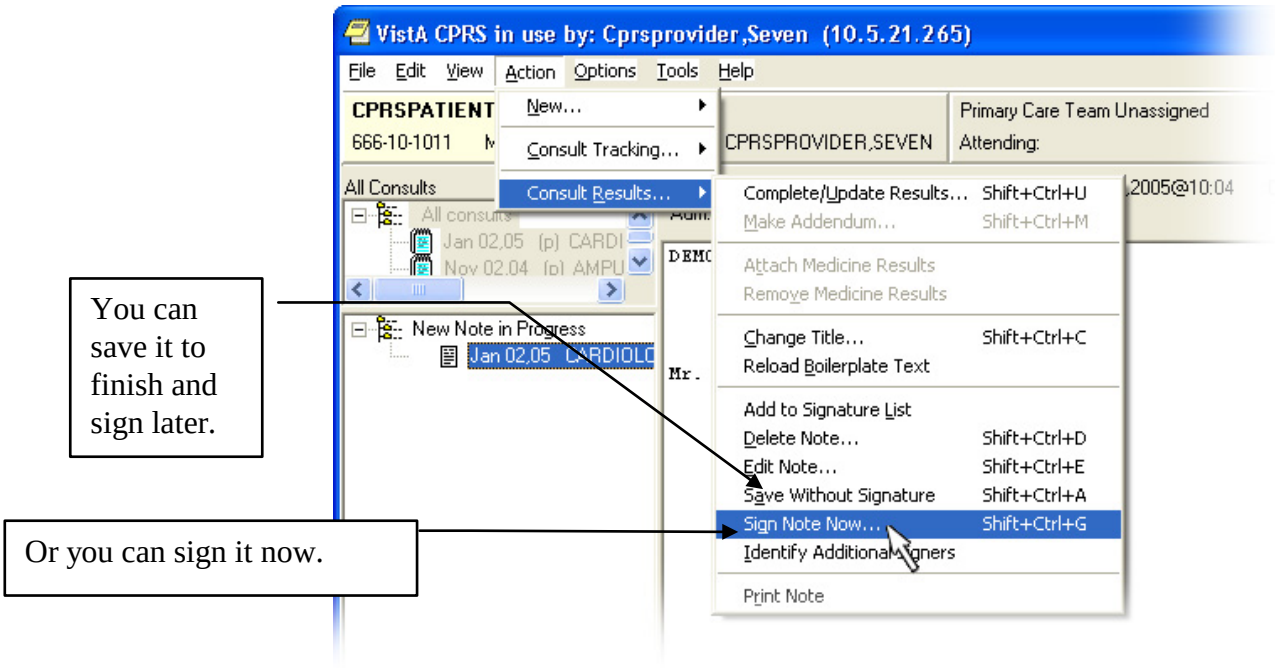


Or follow the underlined character on the keyboard by pressing Alt+A (together), then C, and then F.

3. Type the addendum:



4. Save the note:

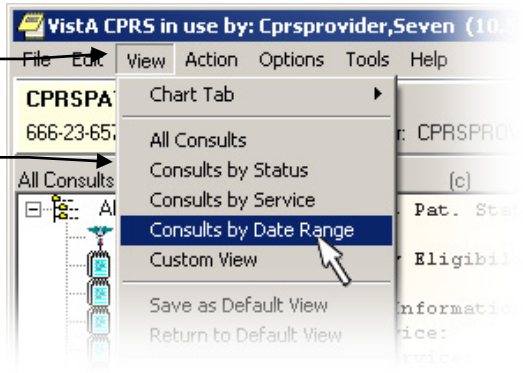


New Date Range

1. Select Consults by Date Range:

Select it from the View menu.

Or use the keyboard to follow the underlined letters: Alt+V (together) then R.



2. Fill in the List Consults by Date Range Dialog:

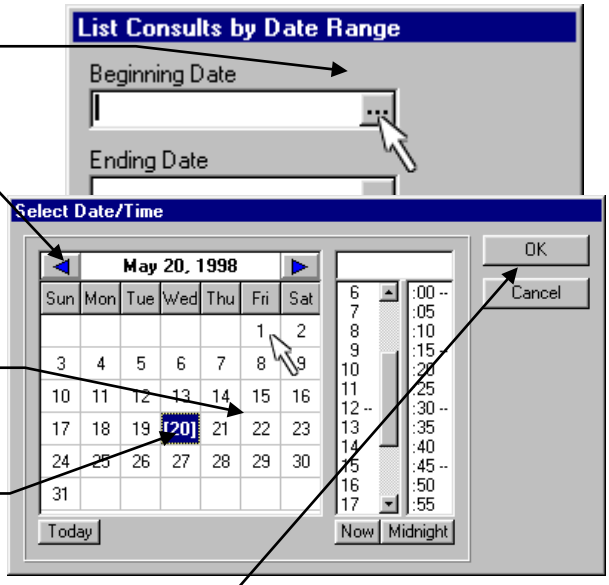
Click on this button for a dialog to simplify entering the date.

These arrow buttons go up or down the months.

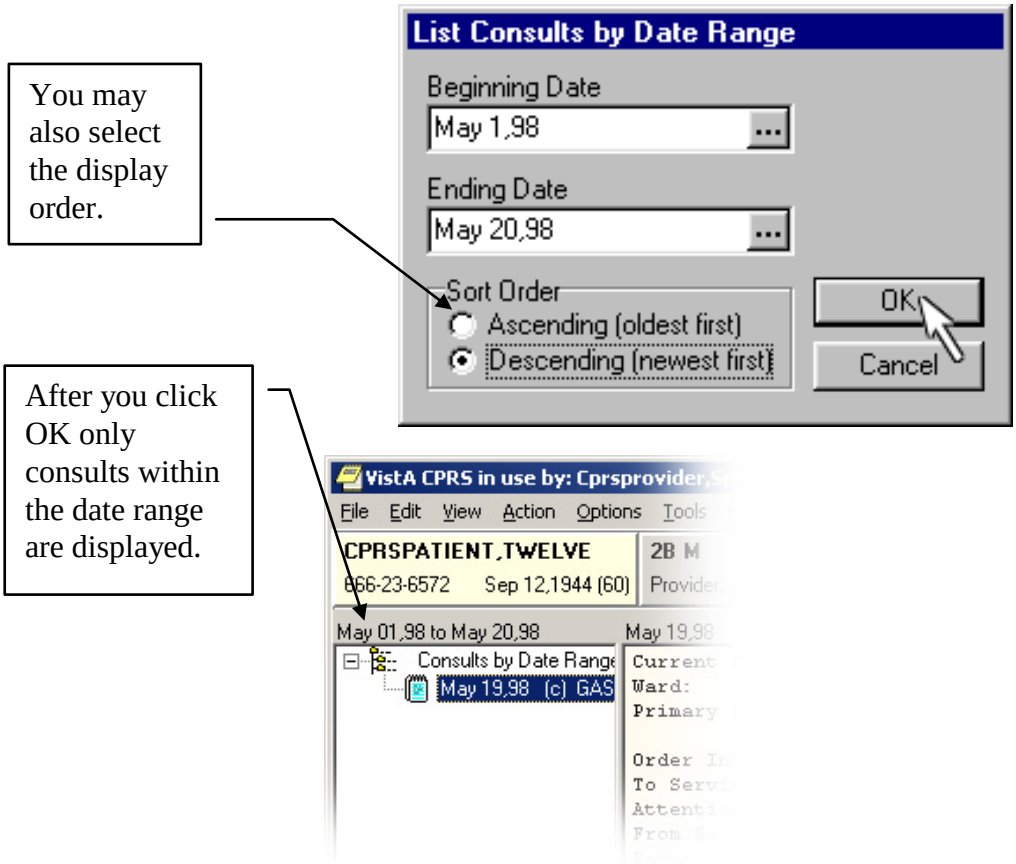
a) Click on the day of the month you want.

Initially, the current date is highlighted.

b) When finished, click OK or press the Enter key.



3. Select OK:



You may also select the display order.
List Consults by Date Range

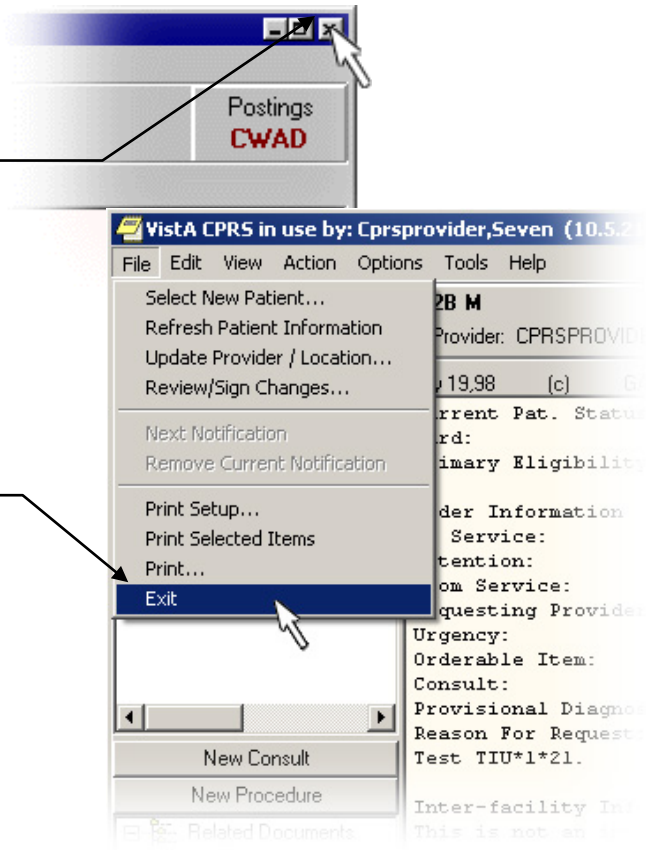
Quit

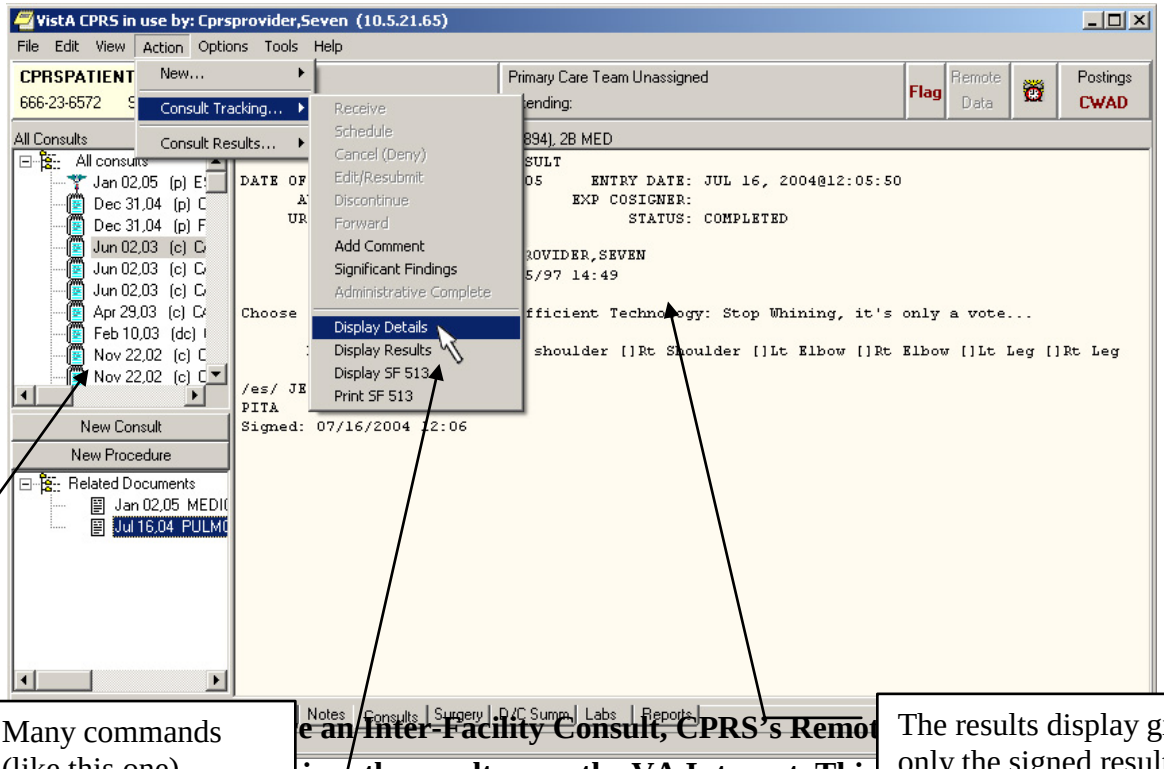
The simplest way to quit is to click on the X in the upper right-hand corner of the window.

Or you can select Exit from the File menu.

Or you can press the Alt and F4 keys at the same time (Alt+F4).



Results Display



Many commands (like this one) require that you first highlight the correct entry.

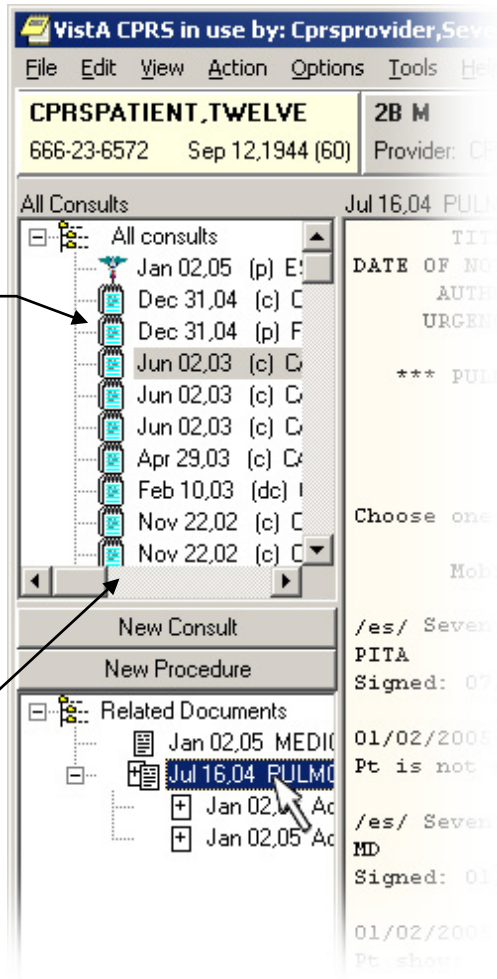
Get the results for the current consult by selecting Action then Consult Tracking then Display Results from the menu bar.

The results display gives only the signed results and addendum making it easier to focus in on the information you need. It also gives author information on unsigned and/or unreleased notes.

Select Consult

a) Click on the consult you want to view or perform an action on.

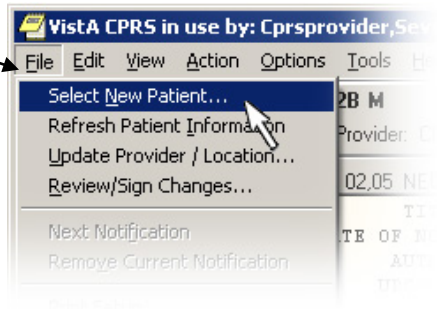
b) If the consult has more than one note associated with it, that is indicated here. For many actions, you must select an item in this pane before performing the action.



Select New Patient

1. Choose Select New Patient from the File Menu:

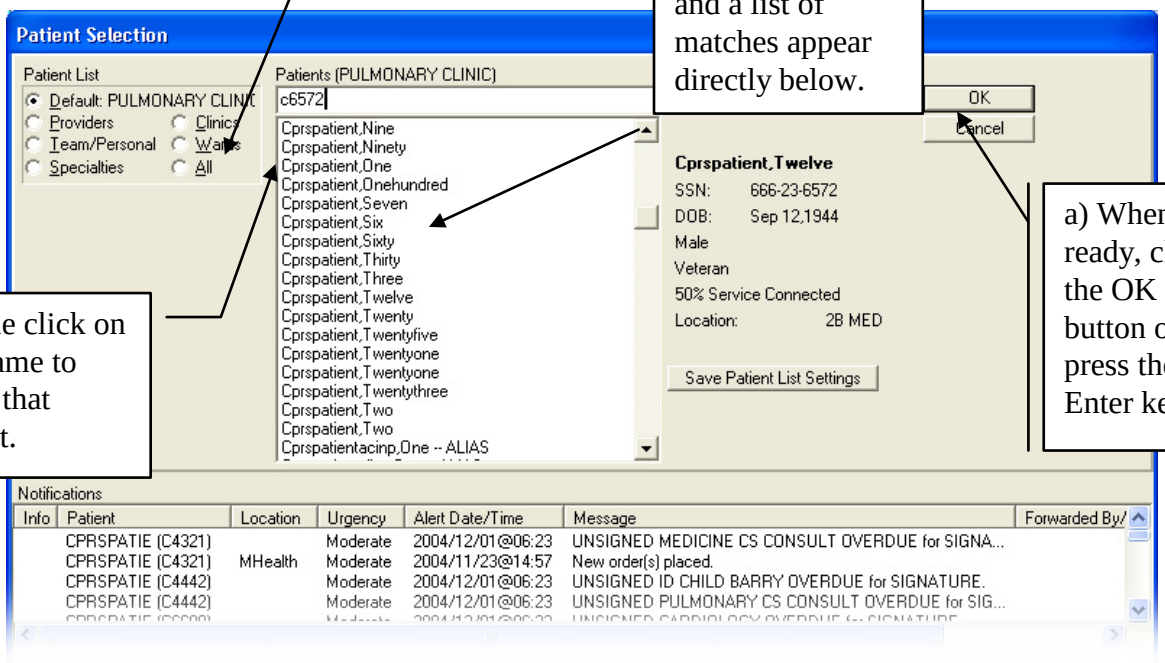
Or follow the underlined letter from the keyboard by pressing Alt+F (together) then N.



2. Use the Patient Selection Dialog:

Click on these radio buttons to change the list of patients.

Type anything here that is allowed in VISTA patient prompts and a list of matches appear directly below.



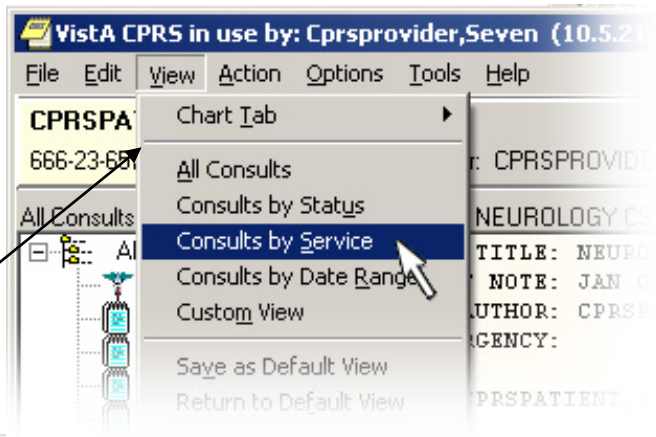
Double click on any name to select that patient.

a) When ready, click the OK button or press the Enter key.

Select Service

1. Select Consults by Service from the View Menu:

Or follow the underlined letters from the keyboard by pressing Alt+V (together) then S.



2. Select the service you want:

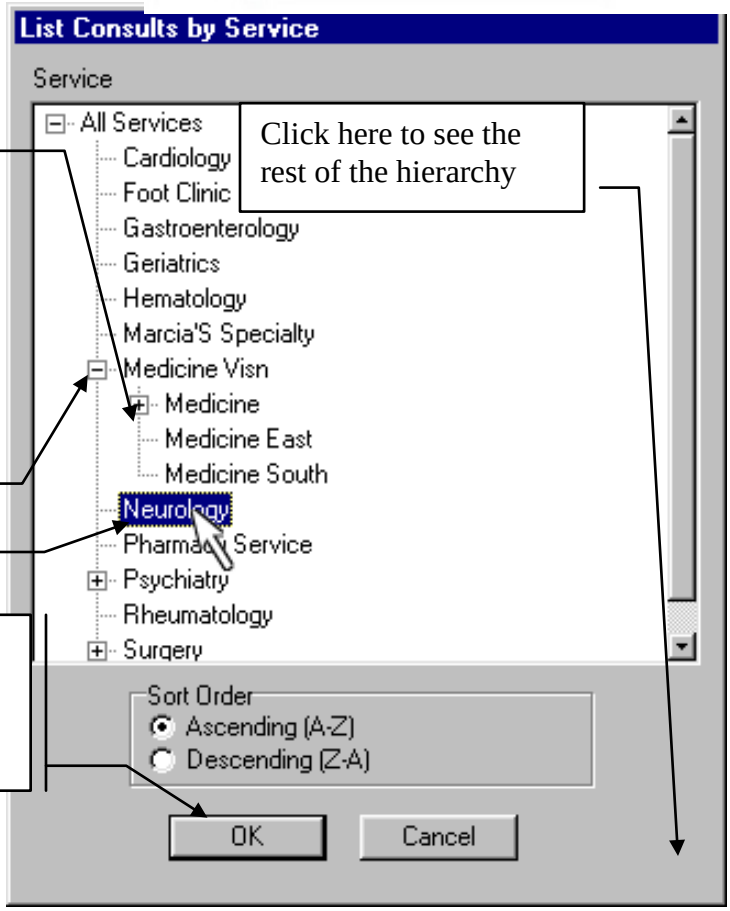
Click on a plus box to expand the hierarchy below it.

Click here to see the rest of the hierarchy

Click on a minus box to collapse the hierarchy below it to a single line.

a) Click on the service you want to select.

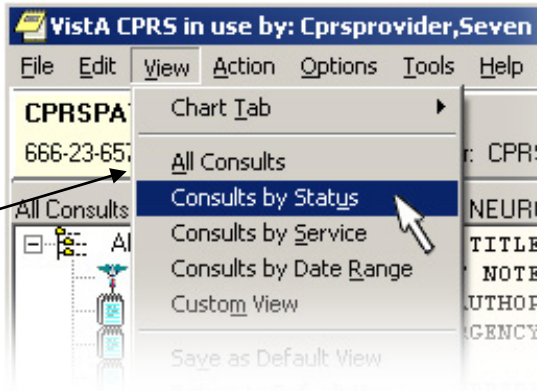
b) Close by either:
Double clicking on the service.
Clicking on OK.
Pressing the Enter key.



View by Status

1. Select Consults by Status from the View Menu:

Or follow the underlined letters from the keyboard by pressing Alt+V (together) then U.

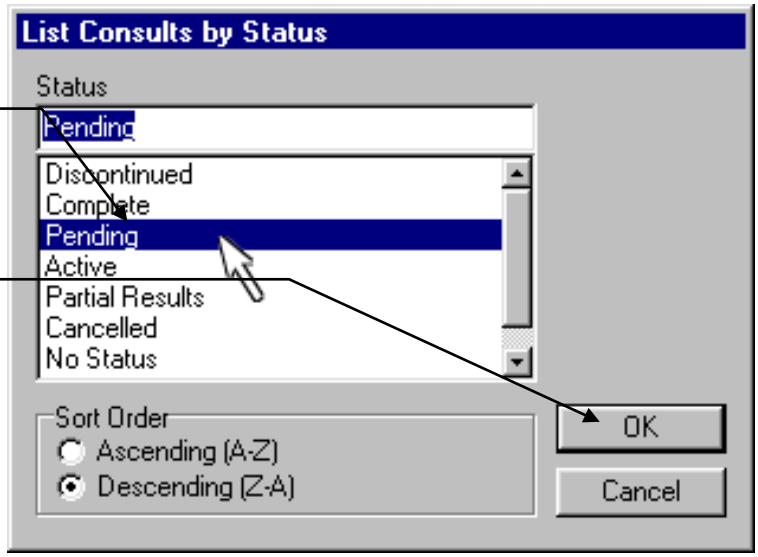


2. Select the status you want from the list:

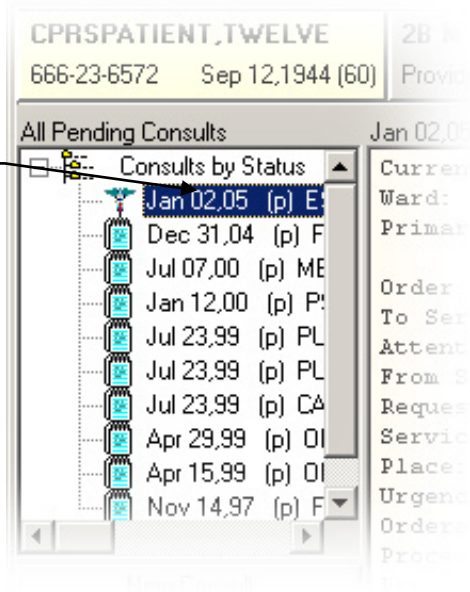
a) Click on the status you want to see.

b) When finished, click the OK button or press the Enter key.

Hold down the Ctrl key when selecting to select more than one status.

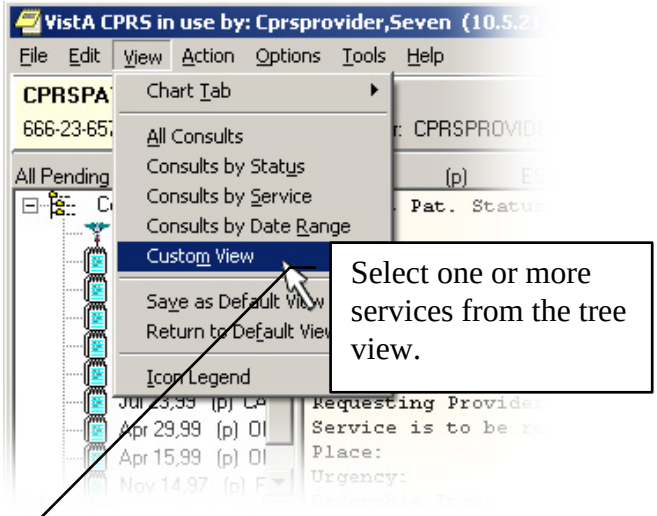


c) Now the list of consults only has ones with the status you selected.



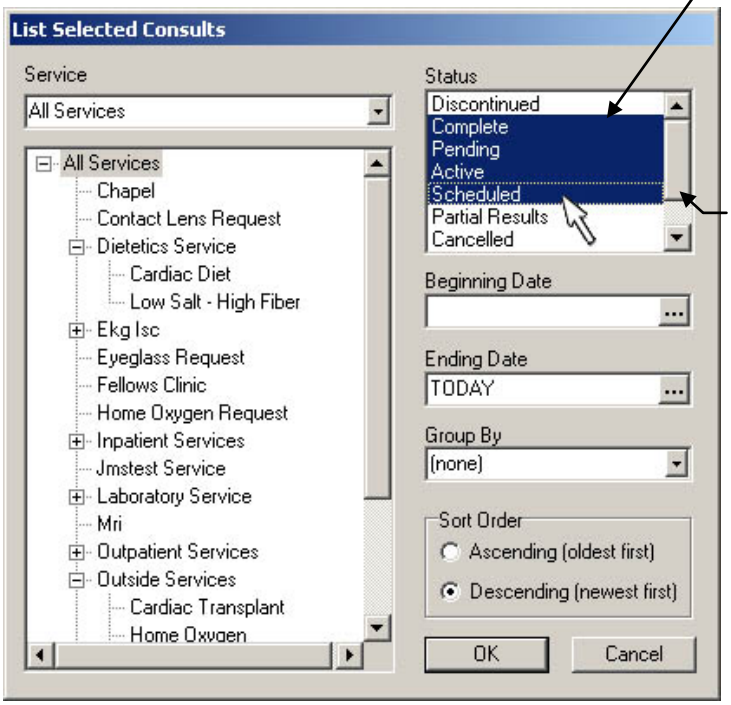
Custom List

1. Select Custom View from the View Menu:



3. Select the view you want.

Do one or more of the following:



Use the shift and Ctrl keys to select multiple statuses (or services).

These buttons open a dialog to help you select a date.

3.Click OK.

Package Reference

There are three menus, six notifications, and 18 actions that make up the package that is Consults. In the preceding section, **Package Operation**, we discussed a number of these in order to explain how the Consult/Request Tracking package works. In this section, we give each of a description of each of these in turn to provide reference information for you.

General Service User Menu

If you are a Consults user from a service other than Medicine or Pharmacy services, you probably have the GMRC General Service User menu. This menu gives you access to all the basic functionality you need to track Consults for your service.
As a General Service User, you have access to three basic options as shown in this example:

```
Select Consult Service Tracking Option: ?

   CS     Consult Service Tracking
   PC     Service Consults Pending Resolution
   ST     Completion Time Statistics

Enter ?? for more options, ??? for brief descriptions, ?OPTION for help text.

Select Consult Service Tracking Option:
```

Consult Service Tracking Option

The Consult/Request Service Tracking option may be used to:

Review the latest activity related to a patient's consult/procedure request orders.
Update or track activities related to a patient's consults.
The menu of actions available to you depends on whether you are a Review Only user or an Update user. The names and the synonyms for each menu action is listed below:

Review Only and Update Actions

ACTION NAME	SYNONYM	GUI Menu Action
Next Screen	+	
Previous Screen	-	
Add Comment	CM	Action|Consult Tracking|Add Comment
Change Date Range	CV;DT	View|Consults by Date Range

Each review screen displayed has a prompt at the bottom of the display screen. This prompt varies according to what Consults thinks you are going to do next. Thus it is either “Select Consult:” or “Select Action:” depending on various system variables. If the prompt is “Select Consult:” you may either select a consult or an action. If the prompt is “Select Action:” you may only select an action. In either case a ? at this prompt provides you with a menu of actions.

Before you use this option, you need to know:

- The patient's name or identification.

  You may identify a patient by entering information other than the patient's name. Some possibilities are: Social Security Number (SSN), Ward Location, or Room-Bed, at the Select Patient prompt.
- The service or specialty.

  The default answer at the Select Service/Specialty Tracking prompt is always ALL SERVICES//. The response you make at the prompt determines what action you are able to select. If you accept the ALL SERVICES default, the Review Only actions are the only ones available. Alternatively, a service/specialty could be specified to restrict the number of consults to review. If you are an Update user for the service/specialty you selected, then you have all actions available to you at the action prompt.

An example of the Consult/Request Service Tracking option and default Review Only actions available for use with the option are shown in the following sample dialogue. User responses are in bold.

```
Select Consult Service Tracking Option: ?

   CS     Consult Service Tracking
   PC     Service Consults Pending Resolution
   ST     Completion Time Statistics

Enter ?? for more options, ??? for brief descriptions, ?OPTION for help text.

Select Consult Service Tracking Option: CS  Consult/Request Service Tracking
Select Patient: CPRSPATIENT,FOUR           01-01-51     666123456     YES     SC VET

Consult Status

The following table gives the statuses that Consults uses, along with their abbreviation, name, and description:

Abbreviation	Name	Description
a	ACTIVE	Orders that are active or have been accepted by the service for processing.
c	COMPLETE	Orders that require no further action by the ancillary service.
dc	DISCONTINUE	Orders that have been stopped prior to expiration or completion.
p	PENDING	Orders that have been placed but not yet accepted by the service filling the order.
pr	PARTIAL RESULTS	All or part of a consult completion report has been entered, but has not yet been signed.
s	SCHEDULED	The receiving clinic has scheduled an appointment for the patient.
x	CANCELLED	Orders that have been rejected by the ancillary service without being acted on.

The following table gives the actions that Consults uses along with the status after the action is performed:

Consult Actions	Status after Action
CPRS Released Order	PENDING
Discontinued	DISCONTINUED
Incomplete Report	PARTIAL RESULTS
Completed	COMPLETE
Edited/Resubmit	PENDING
Schedule	SCHEDULED
Forwarded	PENDING
Canceled	CANCELLED
Added Comment	No change in status
Received	ACTIVE
Printed	No change in status

This table shows actions that are tracked in Consults V. 3.0. Actions that are new with 3.0 are indicated as well as which Consults menu (update or review) initiates the action. If an order status change can result from the action, the new status is shown.

TRACKED ACTION TYPE	New V.3.0	Update Actions	Review Actions	RELATED OE/RR STATUS	Comment
Added Comment		X	X		Review users can add a comment.
Addendum Added To	X	X			Based on adding a signed and released addendum to a completed note via the Complete/Update or Make Addendum action or through TIU actions.
Cancelled	X	X		CANCELLED	This is used in 3.0 replacing the 2.5 Deny action.
Complete/ Update		X		COMPLETE or PARTIAL RESULTS	Changed title to imply Complete can be chosen multiple times by clinicians entering results. TIU actions can also cause this tracking action. Includes the one-time Administrative Complete.
Disassociate Result	X				Currently done through TIU actions. In the future will be used to remove an incorrectly associated note.
Discontinued		X		DISCONTINUED	No longer includes Denied.
Edit Before Release	Obso-lete			UNRELEASED	Moved unreleased consults to Order Entry in CPRS conversion.
Edit/Resubmitted	X			PENDING	The originating provider can edit and resubmit a consult from either an alert or the Consult Tracking screen. An update user may also use this action.
CPRS Released Order				PENDING	Used in 3.0 to represent a signed/released Consult order from CPRS.
Forwarded From		X		PENDING	

Incomplete RPT				PARTIAL RESULTS	Status name has changed from Incomplete RPT. Based on Complete/Update action, and/or TIU actions, if the first consult note is not completed.
New Note Added	X			PARTIAL RESULTS/ COMPLETE	Based on Complete/Update action and/or TIU actions.

Consult Action/Status Overview (Continued)

TRACKED ACTION TYPE	New V.3.0	Update Actions	Review Actions	RELATED OE/RR STATUS	Comment
Printed to					Based on the original order being signed and released, forwarded, and edit/resubmitted. The SF 513 printed at the Service is accomplished with the Consult package hard-coded format. (OE/RR print templates cannot include results.)
Received				ACTIVE	
Schedule	X	X		ACTIVE	The Schedule action does not actually schedule an appointment or link to the scheduling package. It does allow a convenient way to annotate a consult after an appointment has been scheduled by some other means.
Service Entered				ACTIVE	Currently unavailable.
Sig Finding Update	X	X			May be used independently from Administrative Complete action from 2.5.
Status Change	X			ACTIVE	Used by TIU when a note is disassociated from a consult and there are no other results associated with the it.
Unknown Action	X			NO STATUS	Used in displays if action is unknown.

Actions
Brief Action Descriptions
Review Only Actions

DD The ***Detailed Order Display*** action displays specific order activities and details, audit/tracking trails and results.

CT The ***New Date Range*** allows you to change date range while in the Consult Tracking screen. This date range change does not change the patient or require you to select a new patient. It is a subordinate action to Change View (CV).

CV The ***Change View*** action gives you the capability to view consults by Service, Status, or Date Range. This is done by adding the modifying action to CV as such: CV;SS for Select Service. CV;ST for View by Status. CV;DT for New Date Range.

PF The **Print Form** action produces a copy of SF 513.

RT The ***Results Display*** action displays the results of the consult or procedure request order.

SP The ***Select New Patient*** action allows you to select a new patient's name at any time, while using this option, rather than having to log out of the option and log back in.

SS The ***Select Service*** action allows you to select a different service/specialty in which to review orders. It is a subordinate action to Change View (CV).

ST The **View by Status** action allows you to select one or more statuses to display on the screen. It is a subordinate action to Change View (CV).

CM This action synonym may be entered at the Select prompt if the Service/Specialty wishes to add a ***Comment*** to an existing consult order. An example is a comment indicating that the requesting clinician wants a HOLD put on an order that has already been Received and is active in a Service/Specialty.

ER Although the ***Edit/Resubmit*** action shows up on the Review Only menu, it can only be executed by the originating provider or an update user. When a consult is cancelled or denied for clerical reasons (such as insufficient data), then the information on the consult can be edited and resubmitted it with this action. Alternatively, the originating provider may perform this function from the alert.

Q The ***Quit*** action exits all Consults options.

Update Actions

CT The ***Complete Request*** action updates the CPRS status of a consult from Active to Completed. When the patient's consult review screen is displayed again, both the consult's current status and the Last Activity field will be updated to indicate that the consult's new current status is Completed.

Complete Request also links you to TIU so that you can enter findings.

CX The ***Cancel*** *(or* ***Deny) Request*** action may be used by Service personnel to deny a request for completion of a consult/procedure received by their Service. A comment concerning the reason for denial must added when using this action.

DC The ***Discontinue Order*** action allows Service/Specialty personnel to change an order's current status and Last Activity field to Discontinued. In addition, a comment may be added concerning the reason for discontinuance.

FR Entering the ***Forward Request*** allows you to forward a consult or request to any other Service/Specialty, provided that Service/ Specialty has been set up by IRM personnel to receive consults on line. As an example, this action could be used when Cardiology Service has mistakenly received a consult that should have been sent to Hematology Service.

MA The ***Make Addendum*** action allows one or more people to add their comments to the results of a consult. Contrast this to Add Comment, which adds a note to the consult.

RC The ***Received Request*** action is used by a Service/Specialty to acknowledge receipt of a new consult/request in the Service and to update the current CPRS status of the consult/request to Active rather than Pending. The Last Activity field on the patient's review screen will also be updated to indicate that the consult was Received.

RM **The *Remove Medicine Results*** action is used when a medicine result has been attached to a consult in error. It's use is restricted, but generally speaking, it can be done by anyone who can attach medicine results.

SC The ***Schedule*** action can be used by a Service/Specialty to annotate a consult that an appointment has been scheduled for the patient. (It does not schedule an appointment or link to the Scheduling Package.)

SF The ***Significant Findings*** action is used by a Service/ Specialty to mark a consult has having significant findings. When the Sig Findings flag is set to "Y" an asterisk is placed next to the consult in the review display.

☞ **Note: Actions that require you to select an existing order can be done in one of two ways:**

Select the action.
Select the order.

Or

Select the order.
Select the action.

The actions that are affected by this are:

DD Detailed Order Display
CM Comment Order
CT Complete Request
DC Discontinue Order
CY Deny Request
FR Forward Request
RC Received Request
SC Schedule
ER Edit/Resubmit

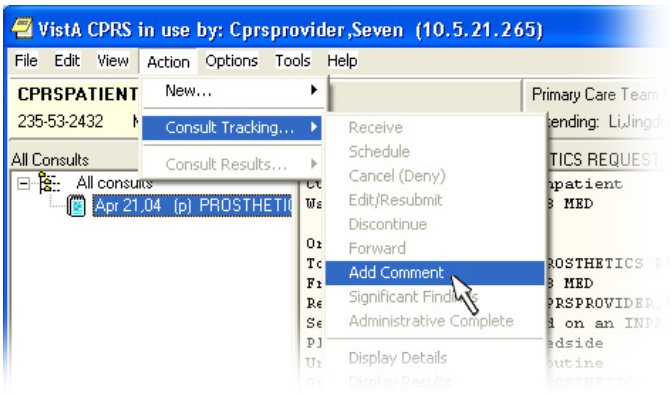
Add Comment (CM) Action

The Add Comment action allows you to append a comment to a consult order when important information about the consult needs to be added to the original order or when a caregiver needs to furnish information before the consult is ready to be closed out.

The Add Comment action can be performed by any user.

To use the Comment Order action from Windows:

- From the Consults tab, highlight the consult you want to add a comment to.
- Select Action|Consult Request|Add Comment.



Note: **If this were an Inter-Facility Consult, individuals from the other facility involved would not be on this list. In this case, the Notification System decides who to notify at the other facility by referring to Consults files.**

Cancel (or Deny) Consult

The Cancel action is one of several options the receiving clinic or service uses to process a request (see **Forward the Consult** under **Work Flow** page 23).

The originating clinician is automatically sent an alert that the request has been canceled. This action is provided for all update options in the Consults package.

Example:

```

```

The originating clinician has then has the option of editing and resubmitting the request. This is done either from the view alerts function, or from the consult tracking screen with the Edit/Resubmit (ER) action. An update user for the subject service may also edit and resubmit a canceled consult.

Change View (CV) Action

The Change View action is really three different actions packaged into one. They are:

- View by Status (ST)
- Change Date Range (DT)
- Select Service (SS)

Enter the CV action followed by one of these three options. You can do this as two different entries, or you can put both commands on the same line separated by a semicolon, like this: CV;DT

In the following example we use the CV action to display selected statues:
With this action you can selectively display consults on the Consult Tracking screen base on the consult's status. In the following example, the display is changed to view only consults with a status of Pending or Discontinued. For a list of consult statuses and their meanings, see page 102.

```

Complete Request (CT) Action

The Complete Request action which updates a consult order's CPRS status to completed (c).

Using the CT action informs the system that you are completely finished with a consult or procedure. An alert is sent to the originating provider and marks the record of the consult as complete.

Finally, the Complete action links you to TIU so that you can enter results. See page 26 for an example of this feature.

If a user is set up as either an Administrative User or on an Administrative User Team, the option exists to perform an Administrative Complete. In the GUI (Windows) interface, this is a separate command under Action | Consult Tracking. In List Manager, if the user has Administrative privileges, then the program asks if an Administrative Complete should be performed. (An Administrative complete does not have results attached to it.)

Deny Request (DY) Action

The Deny Request action has been subsumed by the Cancel action. See Cancel (CX) Action on page 111.

Detailed Order Display (DD) Action

The Detailed Order Display action provides a list of all consult information contained in the computer file.

Example:

```
Select Consult Management Option: CS  Consult Service Tracking

  Document Body

At the time I went to examine the pt, he was acutely broncho-
spastic and in moderately severe respiratory distress.  I had him
deliver a puff of albuterol with an Aerochamber; his technique was
poor. I then instructed him and delivered an additional four puffs,
which he did with good technique.  He was improved and with a clear
lung exam within a few seconds (though wheezes were still present

on forced expiration).

The pt regimen is lacking in inhaled corticosteroids.  Recognizing
that asthma is an inflammatory process, inhaled steroids are important
in controlling the inflammtory response.  My practice for severely
out-of-control asthmatics is to use high-dose inhaled steroids,
typically vanceril, 16 puffs qid, with a spacing device such as the
Aerochamber. I would institute such a regimen while he is here.

The pt has an in-house pet dog and an outside pet cat.  I have
told him that the cat should go, even if it is outdoors.  Cat saliva
contains a glycoprotein that leaves residue on their coats and flakes
into the air; it is problematic for many asthmatics.
The purulent phlegm asthmatics have during exacerbations is usually

Discontinue Order (DC) Action

The Discontinue Order (DC) action is used by clinical personnel to stop a consult/procedure request after it has been signed. This differs from the cancel action in that there is not Edit/Resubmit action available on a discontinued order.

In the example below, the Discontinue Order action is used to cancel a duplicate order:

Select Consult: Quit//
```

Edit/Resubmit (ER) Action

In the case where a consult is cancelled (or denied) for clerical reasons (e.g., test results that indicate that the consult is needed), then the original submitter or an update user for the relevant service has a chance to edit the consult to include the missing information, and resubmit it. This may be done from either the alert screen, or from the consult tracking screen. In either case, the procedure is the same. See **Consult/Request Cancel/Hold** on page 150 for an example.

Forward Request (FR) Action

Entering the Forward Request allows you to forward a consult or request to any other Service/Specialty, provided that Service/Specialty has been set up by IRM personnel to receive consults online. Thus the decision by the referring clinician regarding who should receive the consult can be modified by the receiving Service/Specialty. This action is available from both the CPRS screen and the Consult/Request Alerts screen.
If a request needs to be forwarded to a clinic that is not a sub-service of your clinic, the FR (Forward Request) action should be used. This action is discussed in the **Forward the Consult** section under **Work Flow** on page **23**.

Make Addendum (MA) Action

The Make Addendum action allows one or more people to add their comments to the results of a consult. Contrast this to Add Comment, which adds a note to the consult before it is resulted.

There is an example of Make Addendum in the Windows section on page 82.

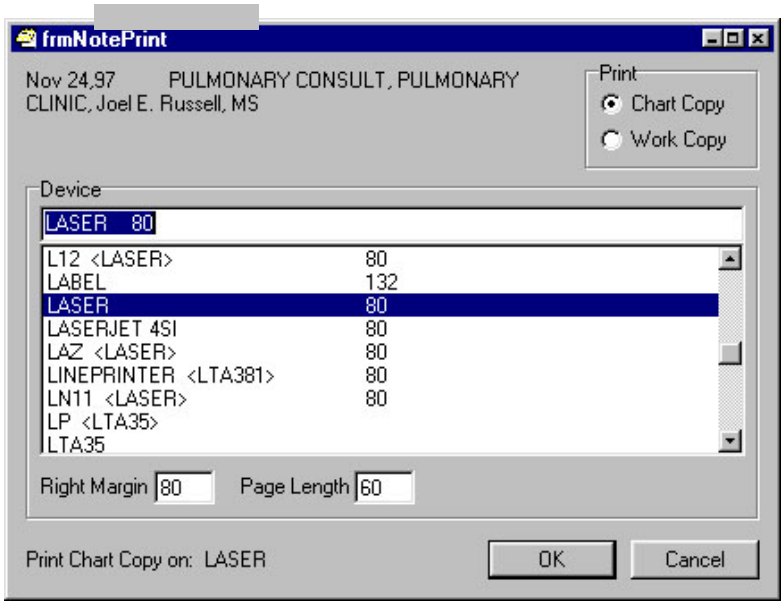
Print Form (PF) Action

With the Print Form Action, you can print either a chart or working copy of the consult form. To use this action from the Windows interface, follow these steps:

From the Consults tab, select the consult you want to print.

- Select File | Print Form.
- Select the printer you want the form to come out on.
- Choose Chart Copy or Work Copy.
- Choose OK.

For an example of the Print Form option as used from the List Manager interface, see page 29.



Print Screen Contents (PS) Action

This option prints the information that is on the screen. The output is not exactly a screen image, as it does not include the prompt area at the bottom of the screen. To print the entire contents of a consult request, use the Print Form (PF) action.
Example:

```
CONSULTS DETAILED DISPLAY     Jun 20, 1997 10:40:56        Page:    1 of    2
CONSULT DETAILED DISPLAY                                 Consult No.: 208

Remove Medicine Results (RM)

This action is used when a medicine result has been attached to a consult in error. It's use is restricted, but generally speaking, it can be done by anyone who can attach medicine results.

Attaching medicine results is done in conjunction with the Complete (CT) action in List Manager. See the section on medicine resulting on page 51 for details. In Windows, attaching and detaching medicine results are accomplished thru their own menu commands that are activated whenever medicine results are available. Fore an example of medicine results in Windows, refer to the Windows Quick Start section on page 72.

In this example, we use List Manager to remove an incorrect medicine results:

```

```

Results Display (RT) Action

The Results Display (RT) action allows you to review results of any consult/request for a patient.

The following is an example of the report displayed when you select the RT action:

```
                      C S L T   R E S U L T S   D I S P L A Y
CPRSPATIENT,FOUR 666-43-8796          2B M              DEC 4,1949 (50)   <CAD>
---------------------- ELECTROCARDIOGRAM SUMMARY REPORT --------------------

DIAGNOSIS
 Interpretation Code (rhythm):  SINUS TACHYCARDIA
 Interpretation Code (config):  ABNORMAL ECG

INDICATIONS
 Type OF EKG:                   STAT RETRIEVAL

SUMMARY
 Summary:                       ABNORMAL
 Summary procedure:             Sinus rhythm has replaced atrial flutter

Press return to continue or "^" to escape   <Enter>
```

Schedule (SC) Action

The Schedule action is similar to the Receive (RC) action in that it changes the status of a consult. There is no interface with the Scheduling Package at this time. This action is intended only for annotational purposes.

Unlike the Receive action, this action sends an alert. You can use this alert to inform the requestor of the date and time of the appointment.
In the following example we change the status of a consult from “p” pending to “s” scheduled:

```
CONSULT TRACKING              Jun 08, 2000 21:14:16          Page:    1 of    1

Significant Findings (SF) Action

The Significant Findings action allows a clinic or service to append a significant findings flag onto a consult (whether completed or not). The action prompts you to enter a comment and sends an alert either at the time the SF action is taken or when the consult is complete. An asterisk is placed next to the consults that have a Significant Findings value of Y.

In this example we add a significant finding to an already completed consult:

```
CONSULT TRACKING              May 01, 1998 14:51:35        Page:    1 of    2

Notifications about Consults and Requests

During your session, you may notice:

```
You have PENDING ALERTS
             Enter "VA VIEW ALERTS to review alerts

Select Clinician Menu Option:
```

This appears on the screen before each prompt. You may enter VA at any menu prompt in which this message appears to view patient information related to pending notifications.

There are five notifications relating to consults:

OE/RR Notifications	Notification Number	Recipients
New Service Consult/Request	27	Service Users plus Attention
Consult/Request Resolution	23	Ordering Provider on Complete
Consult/Request Cancel/Hold	30	Ordering Provider and others as determined by who is taking the action. The NOTIFY ON DC field in file 123.5 affects who gets the alert on DC.
Consult/Request Update	63	Determined by the individual taking the associated action.*
Order(s) Require Electronic Signature	5	Determined by CPRS

The purpose of these notifications is to allow you to take appropriate follow-up action. This might involve merely reading new information, or it might involve several actions on your part such as scheduling an appointment, signing a consult, resubmission, etc.

***NOTE:**

- When a comment is added by an UPDATE USER, the alert will only go to the ordering provider (unless additional alert recipients are added).
- When a comment is added by a SERVICE TEAM member, the alert will only go to the ordering provider (unless additional alert recipients are added).

To initiate the follow-up action, enter VA at the prompt after the view alerts message. In the following example, a user follows up a notification by signing an order:

```
You have PENDING ALERTS
          Enter "VA VIEW ALERTS to review alerts

Select CPRS Manager Menu Option: VA  View Alerts

 1. CPRSPATIENT,ONE (C4723): New order(s) placed.
 2. CPRSPATIENT,THREE (C3456): Consult/Request DENIED To Service: PODIATRY
 3. CPRSPATIENT,ONE (C4723): Order requires electronic signature.
Select from 1 to 3

          or enter ?, A I, F, P, M, R, or ^ to exit
          or RETURN to continue: 3
Processing alert: CPRSPATIENT,ONE (C4723): Order requires electronic signature.

Enabling Notifications

In many cases Notifications will not come to you automatically. To find out what Notifications you should be getting, you can run the Show Me the Notifications I Can Receive option from the Notifications Management Menu. If this report shows any notifications you want to receive that are disabled, you may enable them with the Enable/Disable My Notifications option.

In this example we run the Show Me the Notifications I Can Receive report and then enable Consult/Request Cancel/Hold, Consult/Request Resolution, and New Service Consult/Request (Notice that Order(s) Require Electronic Signature is already on):

```
Select Notification Mgmt Menu Option: ?

   1      Enable/Disable My Notifications
   2      Erase All of My Notifications
   3      Set Notification Display Sort Method (GUI)
   4      Send me a MailMan bulletin for Flagged Orders
   5      Show Me the Notifications I Can Receive
   6      Set Surrogate to Receive My Notifications

Enter ?? for more options, ??? for brief descriptions, ?OPTION for help text.

Select Notification Mgmt Menu Option: 5  Show Me the Notifications I Can Receive

Would you like help understanding the list of notifications? No// Y  (Yes)
DEVICE: HOME// <Enter> VAX

             Notification List Help Message                    Page:   1

The delivery of notifications as alerts is determined from values set for:
Users, OE/RR Teams, Service/Sections, Inpatient Locations,
Hospital Divisions, Computer System and Order Entry/Results Reporting.
Possible values include 'Enabled', 'Disabled' and 'Mandatory'. These values
indicate a User's, OE/RR Team's, Service's, Location's, Division's, System's
and OERR's desire for the notification to be 'Enabled' (sent under most
conditions), 'Disabled' (not sent), or 'Mandatory' (almost always sent.)

All values, except the OERR (Order Entry) value, can be set by IRM
or Clinical Coordinators. Individual users can set 'Enabled/Disabled/Mandatory'
values for each specific notification via the 'Enable/Disable My Notifications'
option under the Personal Preferences and Notification Mgmt Menu option menus.
'ON' indicates the user will receive the notification under normal conditions.
'OFF' indicates the user normally will not receive the notification.
Notification recipient determination can also be influenced by patient
location (inpatients only.) This list does not consider patient location
when calculating the ON/OFF value for a notification.

New Service Consult/Request

This notification is triggered by the Consults package when a new consult has been requested by a user.

In the following example, the system displays three notifications for new Consults:

```
CPRSPATIE (C5377): New consult Neuro (Stat)
CPRSPATIE (C3456): New consult CAR (Routine)
CPRSPATIE (C6572): New consult PLM (Routine)
          Enter "VA VIEW ALERTS to review alerts

Select Systems Manager Menu Option:
```

As a follow-up action, the system displays the consult in a Consult/Tracking screen so that the recipient can take appropriate action. To initiate the follow-up action, enter VA at the prompt and select the notification you want to follow-up on. After selecting this notification from the View Alerts menu, the system deletes the notification.
In the following example, a new consult is first examined and then a receive action is performed:

```
 1.   CPRSPATIE (C2342): NEW consult CAR (Routine)
 2.   CPRSPATIE (C2432): Consult COMPLETED: CAR
          Select from 1 to 3
          or enter ?, A I, F, P, M, R, or ^ to exit
          or RETURN to continue: A

Processing alert: CPRSPATIENT,NINE (C2342): NEW consult  (Routine)

```

Consult/Request Resolution

This notification is triggered by the Consults package when it determines that a consult is complete.

In the following example, the originating provider receives notifications that consults are complete:

```
CPRSPATIE (C3456): Completed Consult CAR HOLTER
CPRSPATIE (C1996): *Completed Consult CAR
CPRSPATIE (C8910): Completed Consult PSURG
           Enter "VA   VIEW ALERTS      to review alerts

Select Systems Manager Menu Option:
```

As a follow-up action, the system displays the Consult/Request and results/report. To initiate the follow-up action, enter VA at the prompt and select the notification you want to follow-up on. After viewing, the system deletes the notification.

Notice the asterisk on the second notification. This means that there are significant findings for that consult.

Consult/Request Updated

This alert is triggered when a comment is added to consult or the consult is scheduled. Comments may be added either with the Add Comment (CM) action or the Schedule (SC) action. The text of the alert is altered depending on which one of these actions initiated the alert as follows:

Adding a Comment #63 "Comment Added to Consult: . . ."
Scheduling #63 "Scheduled Consult: . . ."
As a follow-up action, the system displays the consult with comments. If appropriate, the clinician may write an additional comment or take other actions as needed.

- When a comment is added by an UPDATE USER, the alert will only go to the ordering provider (unless additional alert recipients are added).
- When a comment is added by a SERVICE TEAM member, the alert will only go to the ordering provider (unless additional alert recipients are added).

This alert is also used by the Healthcare Claims Processing System (HCPS) to notify VA providers the status of a patient who has been referred to a Non-VA Care provider or facility. When an HCPS user enters a comment in RAS, CPRS is updated. The HCPS user might not be a user in VistA; a proxy user will display for 'Responsible Person' and 'Entered By' in the CPRS, as shown below:

```
Facility
Activity                Date/Time/Zone      Responsible Person  Entered By
------------------------------------------------------------------------------
ADDED COMMENT           08/08/14 22:31      HCPS,APPLICATION    HCPS,APPLICATION
               (entered) 08/08/14 22:40
Author: DOE,JOHN
```

Consult/Request Cancel/Hold

This notification is triggered from the Consults package when a Consult request is cancelled, discontinued, or put on hold.

In the following example, a user receives notification of a discontinued and a denied consult:

```
CPRSPATIE (C2342): Cancelled consult CAR
CPRSPATIE (C9876): Discontinued Consult MEDICINE
CPRSPATIE (C3456): Cancelled consult POD
           Enter "VA   VIEW ALERTS      to review alerts

Select Systems Manager Menu Option:
```

As a follow-up action, the system displays consult with comments. If appropriate, the submitter may resubmit the consult based on this new information. To initiate the follow-up action, enter VA at the prompt and select the notification you want to follow-up on. After viewing, the notification is deleted by the system.
In the following example, a cancelled order is edited and resubmitted:

```
You have PENDING ALERTS
          Enter  "VA   VIEW ALERTS     to review alerts

Select Consult Service Tracking Option: VA  View Alerts

 1.   CPRSPATIE (C2342): Cancelled consult to PLM
 2.   CPRSPATIE (C3456): Discontinued consult to CAR

Special Considerations for Discontinued Orders

When an order is Discontinued, who gets the notification depends on the source of the discontinuation. This is dependent on the NOTIFY ON DC field in file 123.5 for the service to which the consult was directed. This field is set by the Set up Consult Services (SS) command of the Consult Management Option.

Consult/Request Has an Added Comment

If a comment is added to a consult by someone in the receiving service, that person is prompted to send notification to the originator of the consult and to any other persons. Other recipients of this notification are controlled as a New Service Consult.
In the following example, a clinician in the Surgery service has added a comment:

```
SIMPSON,H (S9999): Comment Added to Consult CARDIOLOGY
          Enter  "VA   VIEW ALERTS     to review alerts

Select Consult Management Option:
```

The follow-up action is to display the orders containing the comments so that you can read them.

- When a comment is added by an UPDATE USER, the alert will only go to the ordering provider (unless additional alert recipients are added).
- When a comment is added by a SERVICE TEAM member, the alert will only go to the ordering provider (unless additional alert recipients are added).

Order(s) Require Electronic Signature

If you do not sign a consult at the time you initiate it, the CPRS triggers a notification reminding you of the need for an electronic signature.
In the following example, three notifications are presented for Consults that need an electronic signature:

```
CPRSPATIE (C3456): Order requires electronic signature.
CPRSPATIE (C4723): Order requires electronic signature.
CPRSPATIE (C3234): Order requires electronic signature.
          Enter  "VA   VIEW ALERTS     to review alerts

Select Systems Manager Menu Option:
```

The follow-up action is to display the orders requiring electronic signature in a CPRS screen so that you can use the Sign action. The system deletes the notification after you have signed the order.

Significant Findings for a Consult

If the status of the Significant Findings Flag is changed in any way, an alert is sent by the Consults package. As far as the recipients and delivery, this notification is treated like a Consult/ Request Resolution.

This alert may be delayed, at the user's option, until the consult is complete.
In the example that follows, three significant findings notifications are present. One for a completed consult, one for a pending consult, and one for the Significant Findings Flag being turned off on a completed consult:

```
CPRSPATIE (C3456): Sig Findings for consult CAR
CPRSPATIE (C6572): Sig Findings for consult CAR
CPRSPATIE (C1432): No Sig Findings for consult PLM
          Enter  "VA   VIEW ALERTS     to review alerts

Select Systems Manager Menu Option:
```

The follow-up action is to display the orders that have had a change in the Significant Findings Flag in the CPRS screen so that you can examine them.

Glossary

Action	An action in Consults can be selected throughout processing to 1) control screen movement, 2) add new consult orders, or 3) process existing orders.
Consult	Referral of a patient by the primary care physician to another hospital service/ specialty, to obtain a medical opinion based on patient evaluation and completion of any procedures, modalities, or treatments the consulting specialist deems necessary to render a medical opinion.
Consulting Site	In the case of Inter-Facility Consults (IFC, see below) the VA facility that originates the consult.
Discontinued Orders	Orders that are discontinued or cancelled.
HCPS	The Healthcare Claims Processing System is a centralized, automated system that will support the management of purchased care referrals/authorizations.
IFC	Inter-Facility Consults permits the transmitting of consults and related information between Department of Veterans Affairs facilities. Consult requests are made to remote facilities because the needed service is not locally available or for patient convenience. Although the Consult Package is utilized in the hospital settings, Consult requests between facilities have been done manually in the past.
Order	A request for a consult (service/sub-specialty evaluation) or procedure (Electrocardiogram) to be completed for a patient.
Order Cancellation	A request to stop performance of a consult/procedure request; the order may be edited and reactivated
Order Discontinuation	A request to stop (discontinue) performance of a consult/procedure request.

Procedure Request	Any procedure (EKG, Stress Test, etc.) which may be ordered from another service/ specialty without first requiring formal consultation.
RAS	Referral and Authorization System; see HCPS.
Request	See Procedure Request.
Requestor	This is the health care provider (e. g., the physician/clinician) who requests the order to be done.
Result	A consequence of an order. Refers to evaluation or status results. When you use the Complete Request (CT) action on a consult or request, you are transferred to TIU to enter the results.
Resulting Site	In the case of Inter-Facility Consults (IFC, see above) the remote site that performs the consult and enters the results.
Screen Context	This term refers to the particular selection of orders displayed on the screen (e. g., Medicine consults for the patient Ralph Jones).
Service	A clinical or administrative specialty (or department) within a Medical Center.
Status Result	A result that indicates the processing state of an order; for example, a Pharmacy TPN Consult order may be discontinued (dc) or completed (c).
Status Symbols	Codes used in order entry and Consults displays to designate the status of the order.
